

Talview Proview Live Proctoring

Combine the power of human monitoring with automated technology for the world's most flexible and secure remote proctoring solution.

Talview Proview Live Proctoring is a comprehensive platform that combines the power of AI-enabled automated proctoring with active human monitoring and intervention. This all-inclusive solution enables you to deter cheating and administer secure end-to-end exams anytime, anywhere.

Talview's robust proctoring technology that is highly scalable and cost-efficient, along with a thorough proctor empanelment & monitoring process, sets it apart from the competition.

With Talview Proview Live Proctoring You Can

Launch Exams and Authenticate Candidates

Highly-trained proctors will guide test-takers through exam launch, login process, multi-factor identity verification, and 360° environment security check.

Monitor Exam in Real-Time

Proctors will monitor test-takers in real-time, intervene when necessary, send warnings, and make announcements via private chats.

Flag Events and Log Violations

Proctors can watch the live feed, check and filter the log list, validate flags raised by AI, manually log violations observed, and suspend events when necessary.

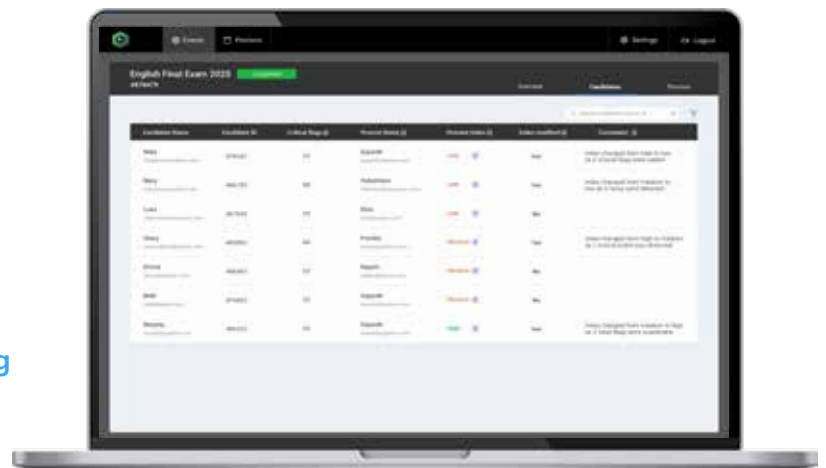

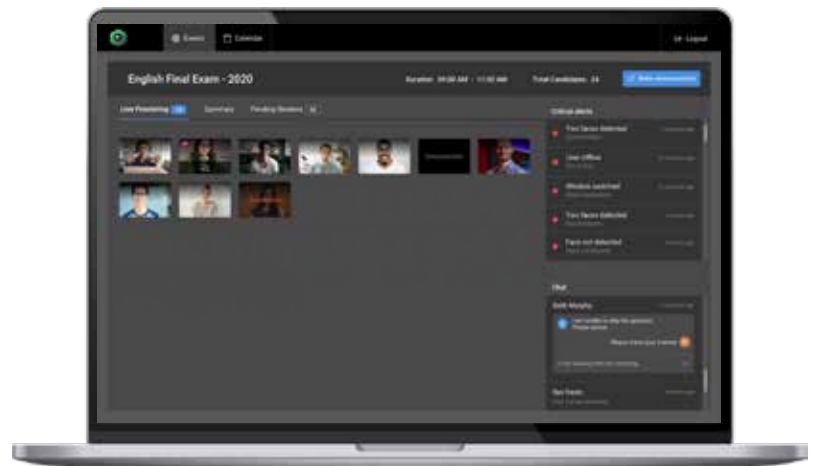

Generate Robust Report

Reports are generated within 24 hours, with end-to-end recording and time-stamps, low, mid and high event logs, Proview Index, and proctor notes.

Boost Security with Advanced Automated Proctoring

Our AI-enabled automated proctoring doubles up security using advanced video and audio analytics monitors behaviors and raises flags.

Talview's User-Friendly Platform

Integrate with Any Test Engine & Mobile App

Our platform can be integrated with any app, website session, LMS, and test engine that needs to be proctored.

Use the Platform with Total Ease

Our platform's UI is easy to navigate and manage. This adds great flexibility as clients can simply access to the platform and use their own proctors.
