

UBDS has migrated over 150 applications to cloud, including Microsoft Azure – our track record is 2 applications per week.

Reduce hosting costs from £'000s per application to £'s

01

DISCOVERY

A proven method for identifying your current estate and suitability for Azure.

02

STRATEGY

Determine the suitable destination for each application and service based on the underlying technology, data security classification, method of access and application integration.

03

ROADMAP

Deliver a roadmap for migrating these applications and services to Azure, reflecting the types of risks and challenges to migration and how best to integrate with other parts of your estate.

04

IMPLEMENTATION

You will be able to move from this assessment straight to implementation.
