FIVE REASONS

FOR CLOUD DATA WAREHOUSE

1

COST

Reduce hosting and infrastructure costs by lifting and shifting databases, data warehouses and applications to the public cloud.

2

PAY AS YOU GO

Reduce ongoing costs by only paying for resources and capacity as required.

3

CAPACITY

Increase data warehousing capacity to a practically limitless amount.

4

BUSINESS AGILITY

Become business agile by integrating mission critical on-premise applications with cloud-based SaaS and public-cloud hosted apps.

5

DATA GOVERNANCE

Ensure data governance by embedding best practice into integration and data management.
