

AzureSmart On-Premise to Azure PostgreSQL Migration Customer Success Story

Migration performed for Oil and gas related product based organization

Founded in 2013, our customer, a leading Oil and Gas related product-based organization. Their products are used in 13 states for the field data capture, production data management, and reporting of over 20,000 oil and gas wells & supports hundreds of operators and back office staff in U.S. territories.

BUSINESS PROBLEM: APPLICATIONS, DATABASES AND INFRASTRUCTURE MODERNIZATION AND MIGRATION

1. Our customer's vision is to transform their business and eliminate, strengthen or modernize their processes that are not efficient.
2. Lower TCO of Application Portfolio and associated infrastructure
3. Lower Administrative costs and complexity of current environment
4. Improve performance, stable Azure PostgreSQL databases
5. Improve ability to scale environment

Our Solution

Migration done using Export and Import option and DMS (Database migration service)

1. To achieve Company's vision of business transformation, Motifworks solution performed assessment and migration for healthcare organization to move from On-premises PostgreSQL to Azure PostgreSQL databases.
2. We have supported in pre-migration assessment, migration of test and prod environment PostgreSQL databases to Azure PostgreSQL using our talented expert's team.
3. Build our customer institutional knowledge to increase velocity, adoption and success of client approach to Azure via education on Best Practices

AzureSmart On-Premise to Azure PostgreSQL Migration Customer Success Story

Migration performed for Oil and gas supported organization

INDUSTRY

Healthcare, Nursing

COMPANY SIZE

500+ Employees

COMPANY REVENUE

\$3 Billion

LOCATION

Tulsa, Oklahoma,
