

AZURESMART APP MODERNIZATION WORKSHOP

Azure Service Fabric and Containers

Today

- Siloed applications built in isolation
- Limited set of platforms and form factors
- Overabundance of data
- Servers and infrastructure to manage
- Upfront capacity planning, fixed scale

Future

- Multi-channel applications covering all touchpoints
- All major platforms and form factors supported
- Data-driven intelligence in applications
- Focus on application functionality, not infrastructure
- Elastic, unlimited scale

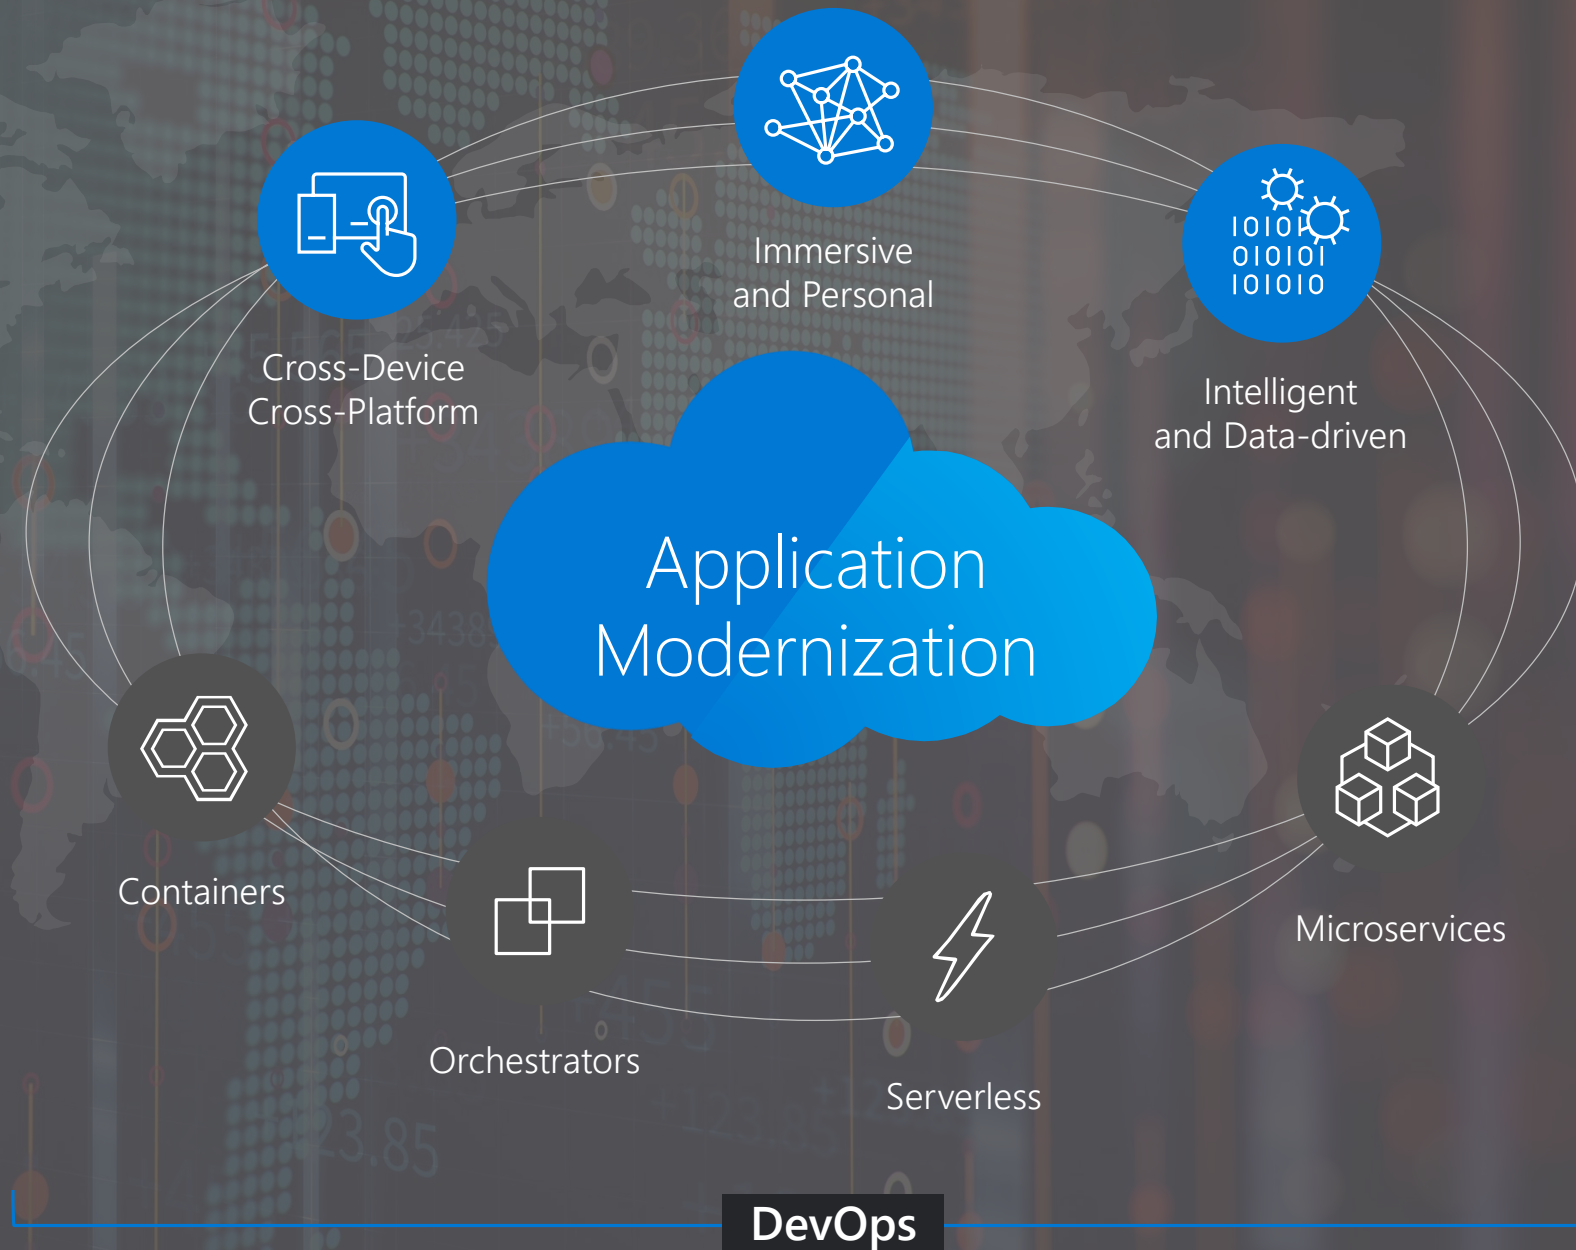

How can I make sure that my existing applications can take maximum advantage of cloud capabilities?

It looks like I need to start from scratch or rebuild for the cloud?

How do I get started, I have so many apps!

Application Experience

Application Architecture

APP MODERNIZATION USING CONTAINERS

Powered by Azure Service Fabric

2 Weeks

Modernize Your Apps in Cloud Using Containers

Containers can help you modernize your existing applications for the modern world. This pilot offering is designed to assess and migrate your applications in Docker containers, modernize the architecture, and deploy to the cloud using Azure Service Fabric

QUESTIONS WE ANSWER

Can I deploy my application **using Containers**?

What **changes are required** to migrate my app to Azure?

Do I need **rebuild my application** for containers?

What will be my **costs in Azure** using containers?

How do I **get started**?

WHAT YOU GAIN

Analysis of application readiness for containers

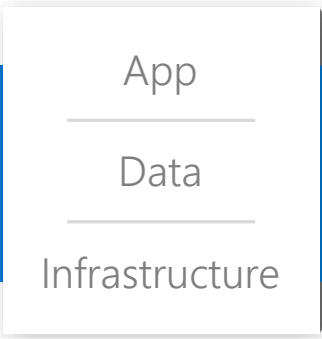

Pilot for deployment using Service Fabric

Automated Deployment package for deployments in Azure

Azure Cost Projections and savings analysis

BUSINESS DRIVERS

- Reduce Capex.
- Free datacenter space.
- Quick cloud ROI.

- Faster, smaller updates.
- Code portability.
- Greater cloud efficiency (resources, speed, cost).

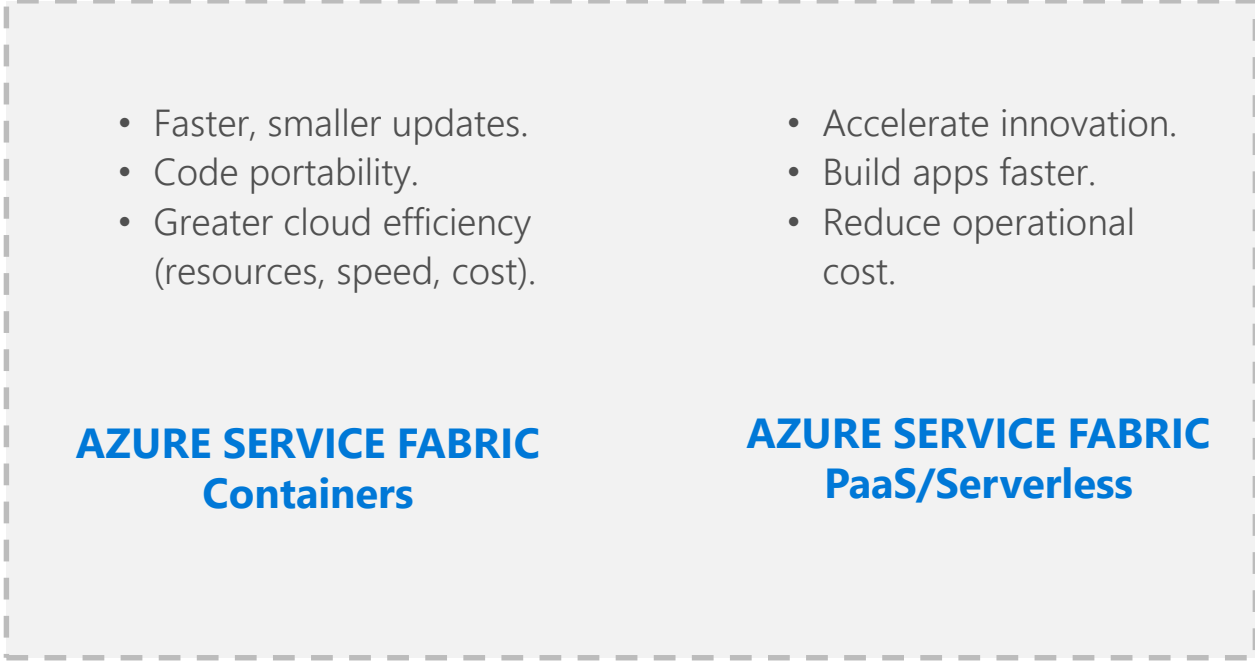

- Accelerate innovation.
- Build apps faster.
- Reduce operational cost.

CORE TECHNOLOGIES

IaaS

AZURE SERVICE FABRIC Containers

AZURE SERVICE FABRIC PaaS/Serverless

FOUNDATION WORKSHOP

MODULE	TOPICS	DELIVERABLE	DURATION
APP MODERNIZATION BEST PRACTICES AND TRENDS	<ul style="list-style-type: none"> • A review of trends and best practices • Review of 5R options and different technology alternatives 	Summary of trends and best practices	1 Hour
LIFT & SHIFT VS REFACTOR USING CONTAINERS VS REARCHITECT USING MICROSERVICES	<ul style="list-style-type: none"> • Technical deep-dive review of each options • Advantages of using each approach • Cost advantages • Use cases • Review of some of the pitfalls 	Comparison and Use Cases for evaluating each approach	1.5 Hour
APPLICATION ASSESSMENT	<ul style="list-style-type: none"> • Review of a legacy/traditional candidate application for assessment • Technical architecture review • Current limitations and business objectives review for the application 	Application assessment results	2 Hours
APP MODERNIZATION RECOMMENDATIONS	<ul style="list-style-type: none"> • Review of the recommendations for modernizing the candidate application 	Analysis and Recommendations for App Modernization	1.5 Hour

DURATION: 1 DAY
