

DIGITAL TRANSFORMATION: 6-WEEK STRATEGY & EXECUTION

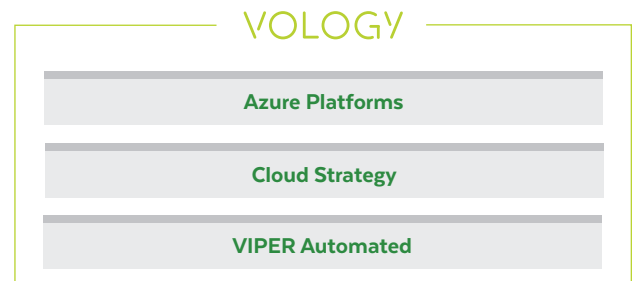

Vology's Digital Transformation is intended to help our customers focus on what matters most with their cloud journey. Lift & Shift is not a strategy, but rather the beginning of a journey to an optimized, well-governed cloud strategy. We will take our customers through their journey to cloud maturity with a data/analytics driven approach to application decisions, migration planning, innovation and governance strategy, and single workload proof of value.

VOLOGY'S MIGRATION SERVICES INCLUDE:

- **Innovation Governance** — Workshop presentation approach to cloud strategy. We plan with you as your partner, not just a vendor.
- **TCO & Financial Analysis** — We will review and build supporting financial planning as part of our migration strategy.
- **Cloud Roadmap & Assessment** — We will provide a business aligned cloud roadmap underpinned by assessment data.
- **Migration Innovation Framework**
 - **Tools Connectivity** — Connect your environment with Vology's world-class assessment migration tools.
 - **Adoption Planning** — We help you plan for adoption of the Azure & 365 services.
 - **Post Migration Operation** — We help you plan for Day 2 operation of your Azure platform for ongoing management.
- **VIPER Innovation** — Our innovation strategy is built on intelligent analytics. We help you make innovative decisions based on data.

POWERFUL OUTCOMES

- We have a deep understanding of how to align technology with long-term strategic goals.
- Build & optimize your transformation with advanced cloud strategy.
- Increased business resiliency and better DR strategy.
- Build your plan with the guidance of the Microsoft Cloud Adoption Framework.
- Demystify cloud ROI — cost reduction is part of our planning.
- Adoption is part of your journey — we help you build a plan.

MIGRATION SERVICES

3-ASSESSMENT & MIGRATION

Vology's migration services takes a system architect-level approach for planning and executing all aspects of your cloud migration which is underpinned by our Office of Innovation. Our core responsibility will include defining necessary refactoring required to make the migration successful, designing strategies for data migration, defining cloud-solution requirements, and determining migration priorities.

VOLOGY'S MIGRATION SERVICES INCLUDE

- **Innovation Management** — Schedule, coordinate and assist in project management & governance of migration.
- **Review of Infrastructure** — Review applications and servers as part of our strategy.
- **Dependency Mapping** — Align migration dependencies, flag and plan for issues before migration.
- **Migration Innovation Platform**
 - **Tools Connectivity** — Connect your environment with Vology's world-class assessment migration tools.
 - **Secure in transit** — Our reference architecture is built on the Microsoft Cloud Adoption framework. Security First.
 - **Structured Migration** — Execute full application workload migration from source to Azure.
- **VIPER Real-Time Migration Monitoring** — Our platform will keep you and our engineers informed during the migration. We know what success looks like!

POWERFUL OUTCOMES

- Enhance the productivity of your business.
- Increased business resiliency and better DR Strategy.
- Enhanced data integrity and security. In-transit data protection during migration for enhanced for security.
- Remove complexity from your infrastructure and data architecture.
- Begin with Lift & Shift, build strategy towards PaaS.
- Real reductions in cost. Migration aligned with financial plan.
