# Azure API Management Services 5-Days POC

# Azure API Management

APIs are at the core of driving digital transformation and are largely acclaimed as the driving force behind digital innovation. Enabling the endless information flow between the product and the customers through API endpoints is what's we do to make the enterprise world more digital.

We help our customers realise their API vision with full lifecycle API management capabilities on Azure API Management. A partner of choice in designing, building, securing and monetising APIs proxy for your organisation, including exposing a self-service developer portal for instantaneous on-boarding

## Why NeosAlpha

We are a certified Microsoft Partner for Application Integration. Our Microsoft Azure certified experts backed up by large number of integration (strategy to implementation) projects experience can help you accelerate your journey to API Economy..

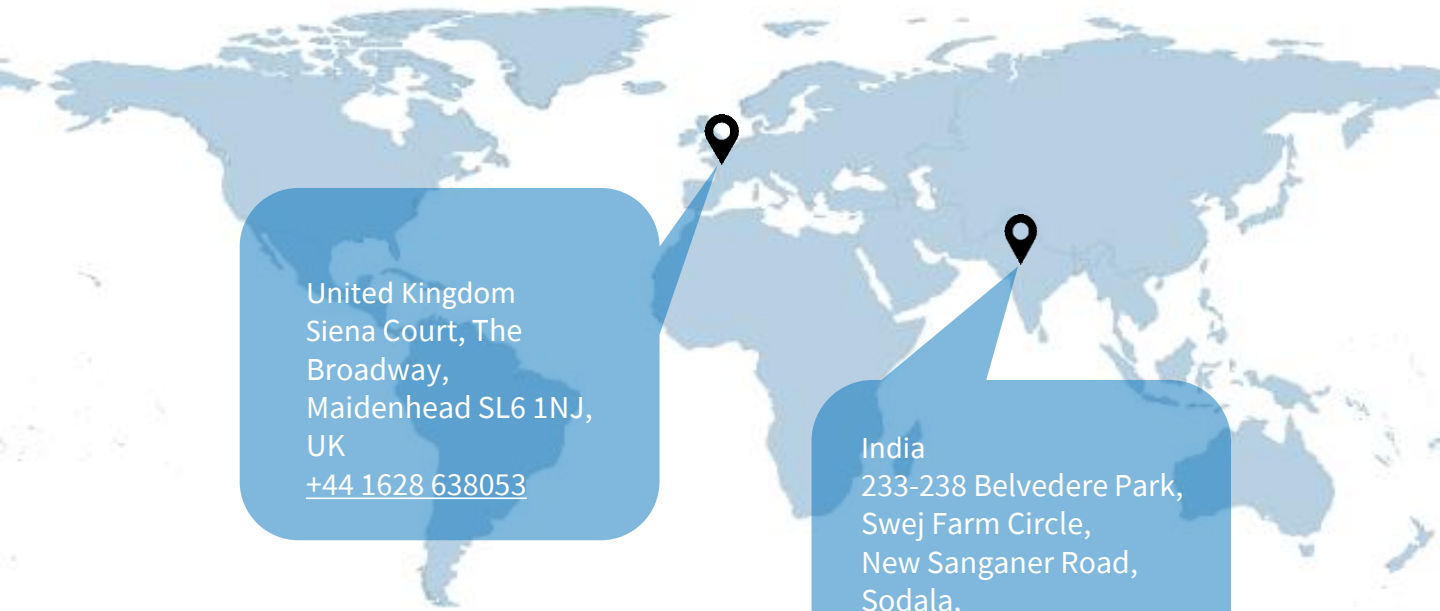

## Our Approach
Building a Proof of Concept that would help you translate your  API Economy vision into working API Gateway.

### Agenda

| | |
|---|---|
| Day 1 | Discovery and Analysis: We start with a deep-dive API Economy workshop to kick-start the initiative covering API user journey, access management, security, monitoring  and monetization. |
| Day 2 | API Proxy design covering API spec, backend services, data mapping, user access and analytics. |
| Day 3-4 | Azure API Management configuration, access and authentication management, developer portal, Iterative API Proxy implementation and testing. |
| Day 5 | Final walk-through of the approach, API Management solution and integration processes demonstration, Proof of Concept closure, and planning of next steps. |

### Deliverables
• POC design,
• implémentation code base and documentation (optional)
