

Data Science Discovery Programme

The Secrets in Your Data - Unlocked.

Data Discovery

We structure your data and discover the connections that enable deployment of modern data science techniques.

Actionable Insight

Elastacloud deliver the actionable insight that allows optimisation in your organisation to drive value and increase productivity.

Data Science

Our Data Scientists analyse your datasets looking for their hidden secrets. Statistical tools and machine learning then deliver patterns.

Data Platform

As we work on your data we build out an infrastructure plan that gives you a scalable, future-proof data analytics platform.

Elastacloud's Data Science Discovery Programme will deliver a pathway to success leaving you with a journey plan and a proven case study based on your data.

Elastacloud believe that Data Science, Machine Learning and Artificial Intelligence are the key to unlocking the true potential of business data. Understanding your data & looking closely at the patterns are the most effective ways of optimising the functionality, efficiency and profitability of your business. Our team of Data Scientists are the best in their field, with a deep understanding of the potential of your business data and its value to you. With our Data Science Discovery Programme, your business will harness Elastacloud's unparalleled understanding.

For eight years, Elastacloud has been at the forefront of cloud technologies and data analytics. Our data architecture and science consultancy has driven business outcomes for many of the UK's leading companies. Elastacloud's skill is unparalleled in the fields of Cloud Architecture, Data Visualisation, SQL, Machine Learning and Artificial Intelligence.

Discovery Session 1.0

- FREE, no obligation session
- Review of your data assets
- Assessment of data platform choices
- Outline of key Data Science tools
- Identify business challenges
- Project plan with statement of works

Discovery Session 2.0

- Fixed cost of £12,000 + VAT
- Structure & analysis of data
- Data connections implemented
- Data Science deployed
- Secrets in your data unlocked
- Detailed report on findings
