Automation

Beyond the hard savings Protera FlexBridge offers IT decision makers the assurance that every step of their HANA Migration project is fully planned based on SAP recommended best practices and SAP validated tool sets to ensure that the entire migration process is fully documented, from initial migration readiness assessment to post-migration acceptance tests.

One Step Migration

Using smart automation to reduce complexity Protera FlexBridge can perform a HANA conversion in one step including; the DB migration to HANA, the OS migration to Linux, the selective upgrade of SAP Applications to a more recent version, and UNICODE conversion if needed.

Areas we can help you

|
