Healthcare Solution *Free Book of Evidence Application*

Microsoft in Health

Dr. Dennis Schmuland
Chief Health Strategy Officer
U.S. Health and Life Sciences

"The HIPAA Book of Evidence App for SharePoint can bring peace of mind to care providers that may not be up to date with their HIPAA compliance policies and processes or would have difficulty delivering the documentation of compliance that an OCR audit will require.. "

Healthcare Compliance - Book of Evidence

Key Activity: #1 : Conduct Risk Assessment

Scope of Area: Security
Citation: §164.308(a)(1)
Implementation Obligation: Required

Established Performance Criteria	Assessment												
Security Management Process - Conduct an accurate and thorough assessment of the potential risks and vulnerabilities to the confidentiality, integrity, and availability of electronic protected health information held by the covered entity.	<table><tr><td>Activity Owner</td><td>Management</td></tr><tr><td>Policy/Procedure Status</td><td>Formal</td></tr><tr><td>Mgmt. Knowledge</td><td>Management Can Describe Activities</td></tr><tr><td>Priority</td><td>Low (120+ Days)</td></tr><tr><td>Status</td><td>Fully (100%) Implemented</td></tr><tr><td>Comments</td><td>Risk analysis was completed in February. Now working through action items identified in the analysis.</td></tr></table>	Activity Owner	Management	Policy/Procedure Status	Formal	Mgmt. Knowledge	Management Can Describe Activities	Priority	Low (120+ Days)	Status	Fully (100%) Implemented	Comments	Risk analysis was completed in February. Now working through action items identified in the analysis.
Activity Owner	Management												
Policy/Procedure Status	Formal												
Mgmt. Knowledge	Management Can Describe Activities												
Priority	Low (120+ Days)												
Status	Fully (100%) Implemented												
Comments	Risk analysis was completed in February. Now working through action items identified in the analysis.												
Audit Procedures	Evidence												
Inquire of management as to whether formal or informal policies or practices exist to conduct an accurate assessment of potential risks and vulnerabilities to the confidentiality, integrity, and availability of ePHI. - Obtain and review relevant documentation and evaluate the content relative to the specified criteria for an assessment of potential risks and vulnerabilities of ePHI. Evidence of covered entity risk assessment process or methodology considers the elements in the criteria and has been updated or maintained to reflect changes in the covered entity's environment. Determine if the covered entity risk assessment has been conducted on a periodic basis . Determine if the covered entity has identified all systems that contain, process, or transmit ePHI .	<p>Title</p> <p>Upload Evidence</p>

US Medical IT

Dedicated to customer service

We support organizations from 1,500 employees to single practitioners with the same quality of care.

Zachary R.,
Director of
Information Systems

“US Medical IT has an extensive background in healthcare compliance which is extremely important to us. After meeting with the owner of US Medical IT, I was very pleased and excited that our companies aligned with one another. US Medical IT is an incredible resource and productive team that can effectively implement a solution to any problem.”

US Medical IT

Founder's relationship with Microsoft

Stephen is a 12-year Microsoft veteran with an extensive network of relationships with Microsoft's Healthcare Leaders.

Dave H.,
Director of IT

"It was important that the vendor that helps with our IT projects has experience with healthcare organizations like ours, especially in HIPAA compliance and has done business within Texas. USM fits perfectly into that bill. US Medical IT is reliable, responsive, innovative and solution-driven. I have complete confidence in US Medical IT."
