# Promote a more sustainable business with Logicalis and BlockC, powered by Microsoft Azure

## **ABOUT LOGICALIS:**

Microsoft Azure Logicalis, an international solutions provider of digital services, is currently accelerating the digital transformation of over 10,000 customers around the world. Our innovative platform, based on blockchain technology and delivered in partnership with BlockC, enables companies to act in a more sustainable way. We create a network that brings together all of the partners and suppliers involved in a product or service to track and offset their carbon footprints.

# WHAT WE OFFER

The Logicalis platform promotes a collaborative ecosystem that efficiently facilitates, manages, and unifies measurement, reporting, and verification (MRV) processes for data on greenhouse gas emissions. Our platform keeps track of carbon credits throughout the cycle via both basic and advanced offerings.

Logicalis has blockchain technology at its core, enabling the creation of a network connecting companies that want to track their carbon footprint with suppliers in a product or service ecosystem, energy generators to register renewable energy certificates, and investors or banks that manage green bonds assets.

Because we leverage Microsoft Azure platformas-a-service (PaaS) solutions, Azure Blockchain Service, Azure Kubernetes Service (AKS), and Azure storage solutions, our platform is easy to scale. Our management and support service also guarantees platform availability and maintenance.

S LOGICALIS

As more companies use our platform to track their carbon inventory, as well as to register carbon or renewable energy certificates, the Azure Kubernetes Service workloads grow. When companies are added to the network, more peers are also added within the Azure Blockchain Service.

# WHAT OUR CUSTOMERS ARE SAYING

"Dengo is proud to be a Brazilian company that produces tasty chocolates while neutralizing its carbon emissions. This was made possible with the great contribution of BlockC, which conducted the entire process and deployment of the project with competence and agility."

- Estevan Sartoreli, CEO of Dengo Chocolates

# Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

# WHY AZURE

## Be future-ready

Continuous innovation from Microsoft supports your development today and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise-grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data science tools.

## Build on your terms

You have choices. With our commitment to open source and support for all languages and frameworks, you can build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support for Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90 percent of enterprises globally.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With its \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.
