A. O. Smith, one of the largest manufacturers of residential and commercial water heating equipment and boilers, offering a comprehensive product line featuring the best-known brands in North America and China, as well as water purification products for residential and light commercial applications. Prior to the automation project, team members across multiple locations had to perform redundant logging and capturing of each invoice to ensure that nothing was missed. A time-consuming, manual three-way matching process was next, including complicated storage, retrieval and tracking for status updates. Finally, and only if there were no exceptions, was the invoice entered into the ERP system.
