

Excellent healthcare since 1929

In 1929 the first nursing home of the Netherlands was founded, the Zonnehuis. The current Zonnehuisgroep IJssel-Vecht (ZGIJV) has one goal: to provide excellent healthcare to its 550 clients.

6 locations

800+ employees **500+** enthusiastic volunteers

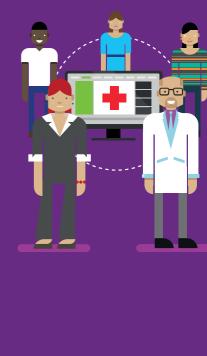

550 clients

The Challenge

IT is becoming increasingly important in healthcare

Healthcare is being shifted increasingly more outside the walls of ZGIJV. Communication in the chain is mostly digital and information in the Electronic Client Dossier must be available at any time and from anywhere. How can IT be arranged so that ZGIJV can focus on its core task: providing healthcare and maintaining optimal alignment between the healthcare process and the information provision, while complying with laws and regulations (NEN7510)

The Solution

All the information in the cloud

infrastructure has been migrated to Microsoft Azure, in combination with Office365, at no additional cost. With the Internet, a ZGIJV employee has controlled access to his or her work space, from any device, and thus also has access to the (medical client) information. This ensures the availability (regardless of the location) and continuity of (medical) information.

ance) issues that ZGIJV wishes to comply with (NEN7510). With the help of Azure Security Centre and Operations Management Suite, a high-quality security and threat intelligence level is enforced on the Azure platform. Unauthorized requests for (medical) information is identified in time. Using Operations Management Suite, Intercept can take immediate action in case of an incident.

The Result

By using Microsoft Azure and Office 365, ZGIJV can: By using Microsoft Azure and Office 365,

ZGIJV can:

1. Focus on its core task

- Scale-up and shrink flexibly
- 3. Access all relevant information 24/7
- 4. Improve the financial forecast
- 5. Prepare the IT infrastructure for GDPR
