AgileDataCenter
Cloud & Virtual Servers

Why choose AgileDataCenter?

AgileDataCenter empowers digital transformation though cloud migration. Agile IT takes the anxiety out of enterprise cloud migrations by offering **full service Azure and AWS migrations** from both on-premises and hybrid servers and networks.

Agile IT's cloud migration service provides security, scalability, and ongoing support, both on-time and in budget with our **fixed price guarantee**. With over **5 petabytes** successfully migrated to the cloud for **over 1000 enterprise clients**, we know EXACTLY what your timeline and investment will be. There are no hidden fees and no surprises.

Specializing in data center, email, tenant to tenant, and identity migrations, Agile IT can lead migrations from existing on-prem, hybrid and co-located servers. Agile IT has vast experience in mergers, acquisitions and divestitures, local and state government projects, security as a service and regulatory compliance and training.

Our Process

Ask	Envision	Measure	Evaluate	Improve	Sustain
Identify challenges and solutions together	Declare scope, expectations, and success metrics	Create, review, and refine implementation plan with client	Deploy proof of concept or pilot program to validate implementaion plan	Deploy new solutions, migrate to new cloud servers, implement new process	Train, secure, support. . . SUCCEED!

Agile Improvement Cycle

Agile IT is widely recognized as one of the leading cloud migration and solution providers. We hold more than 15 Microsoft Partner Competencies, including Data Center, Identity & Access, and Cloud Platform; recognizing our high levels of technical expertise and customer satisfaction.

Agile IT is a top tier member of the prestigious Microsoft SMB Champions Club, Azure Circle Partner, and sits among the top 0.5% of the online services channel. We are proud to be one of only a handful of companies worldwide who have been named as Microsoft Cloud Partner of the Year for four consecutive years.
