Intelligent Document Processing (IDP) Solution

AiDCap

Intelligent document data capture solution

Business needs to be empowered with tools that improve workplace efficiency and reduce operational cost. Documents and record management, and information extraction from them, is one of the pain-points even today, for almost every business function.

This needs an elevation from automated data capture technology to 'intelligent' data capture technological enhancement. Intelligent capture software does not need any templates, keywords, formal definitions, taxonomies, or any indexing to execute data extraction, information processing and final output. It extracts right set of information, regardless of size, format, language or even symbol used in documents of any types.

MOURI Tech's Intelligent data processing (IDP) solution - AI DCap, extracts wide range of data from simple to complex or unstructured documents. AI DCap has ability to continuously auto-learn using its AI algorithms and specific business rules. It is compatible with legacy as well as modern ERP systems. AI DCap is modular, configurable, and customizable and available as public or private cloud solution.

Capture data from any document (handwritten, PDF, scanned or other)

- Invoices
- Purchase orders
- Shipping documents
- Contracts & agreements
- Medical billing documents
- HR forms & applications
- ID cards & passports
- KYC and Tax documents etc.

Key Features

Template less setup

Train AI DCap model with your document

Any format document

Handwritten, PDF, scanned or other

Scalable

Supports high volume and fast processing transactions

Multi language support

Works well with European and Arabic languages

Enterprise level monitoring

Error handling and monitoring analysis

Business process integration

Integration with RPA workflows and ERP

Object detection and classification

Signatures, logo, radio button, checkbox, tables etc.

Built-in security

Secure to handle documents from anywhere

Built on explainable AI

Transparent to your system processes

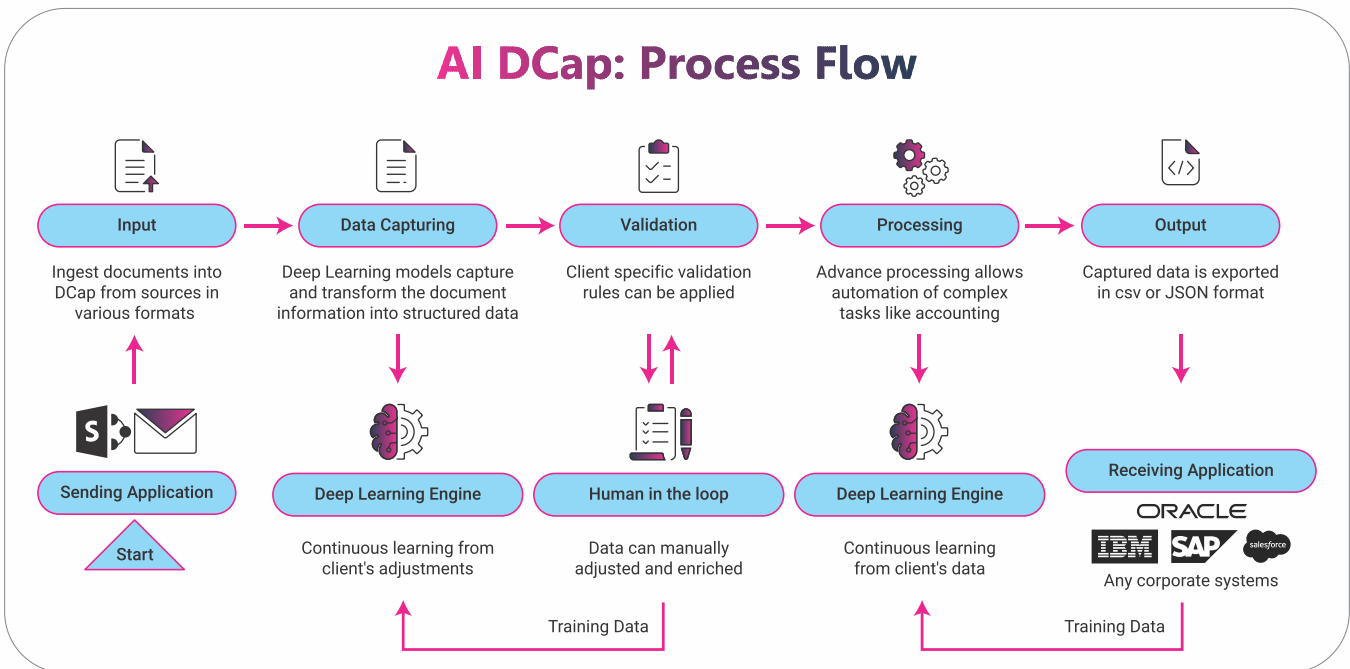

Auto learning with intuitive UI

State-of-the-art UI helps simple ways to train, modulate & analyse performance

Start today with a **Free One Week POC**

AI DCap: Process Flow

Save time and money by eliminating data entry and manual steps by **95%** in your document data extraction processes across the business.

Business benefits from AI DCap

Reduced operational overheads

Move resources to higher-value tasks

Improved operational efficiency

Automated processes with accuracy and speed

Simplified processing

Embed to RPA/ ERP workflows

Resource optimization

Achieve >95% data capture accuracy

Incremental ROI

Auto-learn system resulting higher returns

Reliable

Processing over 5 million pages per month

Create real value in your business processes by automating extraction

About MOURI Tech

Established in year 2005, MOURI Tech has evolved as a trusted global enterprise technology solution provider for its customers from various industries across the globe; helping them transforming to an intelligent enterprise.

Headquartered in Dallas Texas USA and delivery COE in India, MOURI Tech has offices across five continents. With an employee strength of 3000+ globally, CMMI-DEV/3 certified MOURI Tech has wide range of IT solutions and services to cater to digital needs of the businesses of today and tomorrow.

Take forward your digital transformation journey with AI DCap.

Aurasuite.ai is an enterprise AI solution space offering several ready-to-use solutions to help businesses leverage valuable insights from their data for innovation and growth.
