Frequently Asked Questions

Do I need to have my own Cloud account or signup for trial subscription in order to use CloudLabs?

CloudLabs will provide you a temporary cloud account for completing the labs. You do not need to signup for any trial or bring your own subscription.

What all resources I can create in a CloudLabs provided cloud account?

CloudLabs subscriptions are configured to allow you to deploy the required resources and SKUs as per the lab instructions. However, it does not allow you to create any additional resource beyond the scope of lab.

What is the duration for the lab environment?

Each module is timed separately, please refer to the course description for the lab duration. If you need additional duration, please contact support at cloudlabs-support@spektrasystems.com to request extension at additional cost. Lab environment once deleted cannot be recovered. This also applies for single module labs.

Can I take breaks during my lab time?

You can activate the lab modules independently within 30 days of your order; however, you must complete one module in one sitting once activated. This also applies for single module labs.

Can I appear for relevant certification exam after completing these labs?

Preparing for a certification exam is a comprehensive learning exercises and labs are a crucial part of it. While CloudLabs helps you prepare for exam, you may need additional resources to be able to pass exams, such as documentation, training videos, practice tests etc. Please refer to Spektra Academy (www.spektraacademy.com) for a more comprehensive certification preparation offering by Spektra Systems.

Does this package include exam voucher?

Exam vouchers are NOT included in this package.
