

Process Intelligence

Get actionable insights that help you immediately start saving and earning more. Extract the knowledge waiting within IT systems to make your business the best it can be.

**Boost revenues
and savings through
process analysis.**

Create value by improving and redesigning business processes. Analyze millions of activities that are taking place in your business within seconds. See how people, machines, and software interact. Understand what happened, why, and what's going to follow in the future. Prevent inefficiencies, get rid of process steps that are taking up time, maximize team productivity, see immediate cost savings and revenue growth.

Who's it for

Industries

No matter the industry you work in, or the size of your company, all businesses share one common goal — the desire to be a top performer. We can help with that.

Banks & Finance

Supercharge advisor productivity - analyze end-to-end sales engagement and discover new cross-sell and up-sell opportunities. Uncover risks and exposures in real-time and optimize fraud management.

Healthcare

Discover vulnerabilities and cost drivers across the entire hospital management system. Streamline care coordination with smarter patient management, so patients and hospital staff can focus on what matters, treatment, and recovery.

Retail

Maximize revenue by effectively managing your inventory, purchasing, and employees. Drive customer loyalty by innovating around every step of the shopper journey to provide the best possible customer experience.

Manufacturing

Minit brings maximum efficiency to your order, production, and distribution processes. Quickly react to fluctuations in demand, track your productivity and use of materials. Your products will always be on time, in the right quality and quantity.

High Tech & IT

In a competitive field requiring constant innovation, provide complete transparency across the entire design, engineering, testing, and fabrication process, significantly reducing risk in the end-to-end process.

Telecommunications

Consumers are expecting more from their providers while trusting them less. Regain their confidence with a customer experience that wows. Shorten your innovation cycles, improve on-time payment, and accelerate your Go-To-Market.

Transport & Logistics

Achieve maximum efficiency in your logistics, sales, service and other processes. Streamline your logistics network and optimize throughput ties, warehousing and delivery.

Energy & Hydro

Optimize your infrastructure and continuously oversee all maintenance processes. Identify and eliminate inefficiencies and quickly react to changing regulatory requirements and monitor their implementation.

Public Sector

Support the needs of today's connected citizens. Identify vulnerabilities and inefficiencies in your large scale complex processes. Inspect established processes to uncover potential for savings of time and money.

Improve & Optimize Every Process

Minit helps you achieve operational excellence in your company. Boost productivity from sales to support, and achieve customer satisfaction.

PROCUREMENT

Optimize procurement process from the creation of a purchase order to the payment of an invoice.

DISTRIBUTION

Speed up your distribution, minimize throughput times between delivery and invoicing.

SUPPLY CHAIN

Improve how your supply chain operates in real-time from order entry to cargo delivery.

LOGISTICS

Boost efficiency of your logistics network, eliminate delays.

MANUFACTURING

Uncover manufacturing inefficiencies, ensure contracts are being produced on time.

ACCOUNTS PAYABLE

Eliminate inefficiencies in this high volume process running through many systems and departments.

IT SERVICE MANAGEMENT

Improve solution times, accelerate and optimize First Level Support and more.

UTILITIES

Achieve transparency and higher efficiency in complex service processes.

MASTER DATA MANAGEMENT

Control this core process spanning different departments, factories and organizational units.

Why Minit Success Stories

Stay ahead of your competition with cutting edge process mining technology. Proven to drive efficiency and growth, Minit both helps you increase revenues and decrease costs.

-90%

reduced time
to analysis

CGI

"Important innovation in process consulting business. Within seconds, Minit automatically analyses processes in detail impossible to achieve manually by consultants."

Dušan Hečko
Director, Financial Services

+60%

higher productivity

GEFCO

"At first we were quite skeptical; after all, we've been running efficient automated processes for years. Analysis with Minit uncovered several optimization opportunities, which led to 60% increase in productivity. We are now able to process orders and invoices for two more country HQs without adding more staff."

Michal Bugar
CTO

+50%

improved student
engagement

VŠM
CityU
of Seattle

"We used Minit to compare learning habits of A & B grade students to E-graders. This analysis led to the creation of best practice guide which resulted in higher student engagement."

Branislav Zlocha
Director Marketing & Development

What's the Difference Advantages

ACCURATE PICTURE

Shows you processes as they really happen, based on objective data.

ACTIONABLE INSIGHTS

Identifies problematic areas and shows you where to start saving and earning.

FAST RESULTS

Manual process analysis takes months to complete, Minit takes just seconds.

UNIVERSAL SOLUTION

Process analysis with Minit works for every industry, every company, every process.

COST EFFECTIVE

Helps you create targeted solutions that save time and money.

DETAILED FINDINGS

Analyses processes in detail impossible for consultants to achieve manually.

Extracting Knowledge

How it Works

Minit turns company data into value by combining ideas of process modeling and analysis on the one hand and data mining on the other.

01 Data Collection

Everything is logged. The data needed for analysis of your business processes is already waiting. It's in the systems daily used in running your company - ERP, CRM, Service Management, BPM, LOB, Call Centers, and more. Minit connects to these systems and extracts information. If a process spans across several different systems, event logs from these are combined to create a complete picture of your process.

02 Process Synthesis

Minit's process mining algorithms combine events, analyze their chronological order, correlations, frequency, and performance. They reduce the complexity of the data and categorize it in a way that makes it possible to deduce all relevant information. All of this happens within seconds. Even data logs containing billions of events are processed on the fly, with minimal hardware requirements.

03 Process Analysis

Minit visualizes each process as an interactive map containing all relevant information down to single case level. Minit highlights exactly where problems in the process occur, and helps you find connections, causes, and solutions.

Product Overview

Features

Minit was designed to fit perfectly into the workflow of professionals. With fastest process mining algorithms and streamlined user experience, it allows you to focus on the job at hand rather than the tool.

Process analysis

- ✓ Automated "as-is" process discovery and process mapping
- ✓ Process analysis or Social network analysis
- ✓ Performance analysis or Frequency analysis
- ✓ Process metrics and statistics for in-depth analysis
- ✓ Process variants with detailed flow visualization
- ✓ Rich data detail for process activities and paths
- ✓ Advanced filtering options and criteria combinations
- ✓ Process compare for different views, filtered by various criteria
- ✓ Animate any process map or social map

Application

- ✓ Ultra-fast operations on Big Data
- ✓ Robust connectivity options to data sources
- ✓ Various BI tools integration
- ✓ Touch-friendly user interface
- ✓ Advanced security options and user management
- ✓ Multi-user/Multi-project collaborative environment

Deployment Scenarios

- ✓ Standalone
- ✓ On Premises
- ✓ In the Cloud

and more...

Robust Connectivity Data Sources

Minit was built to handle analysis of Big Data for Fortune 500 corporations, with ease. It connects to the source and automatically retrieves relevant event data for process analysis. Data from different systems can be combined for an end-to-end analysis of the business process.
