Accelerate your migration to Azure

Kloudily Azure Migrations

Desktops and apps in the cloud. Accessible from anywhere.

Move your desktops, servers and networks to the cloud. Suitable for organisations who need to:

- Modernise legacy hardware and software platforms
- Bridge private and cloud technologies
- Support secure remote computing
- Deploy LOB apps without on-prem technology
- Test and development workloads
- Desire to transition to a serverless operating model (SaaS) or Cloud first strategy
- Disaster recovery platform

We deploy at scale, you'll save up to 63.7% on Azure migration costs.

Quickly access cloud services without the expense of a multi-month project. With Kloudily you can deploy a new cloud environment from 2-hours and migrate all your infrastructure in under a week, saving up to 63.7%.

- Reduce and flatten costs with OpEx model;
- Eliminate expensive hardware and in-house servers;
- Simplify IT spend with a single solution;
- Predict costs well ahead of time based on capacity;
- Adjust usage based on organisational needs, so costs and revenue are in alignment;
- Work from anywhere, from any device;
- Remove VPNs, slow performance and high backup costs;
- Go "green" by fully moving to the cloud.

IT-as-a-Service (ITaaS)

Move your entire infrastructure to the cloud, servers, applications, file servers, backup, DR and security.

Extend on-premises RDS deployments, add virtual desktop capability to existing on-premises environments

Deliver world-class virtual desktops to your on-premises environment. Lift and shift your existing virtual desktop environments to Kloudily.

Cloud Infrastructure
Take care of your servers, backup, disaster recovery and infrastructure in the cloud.

Cloud Desktops
Ideal if you only need virtual desktop environments with added security.

Complete IT in the Cloud
Your complete IT environment is secure, managed and optimised by Kloudily.
