Upgrade to Microsoft Power Platform: 4-Wk Implementation

Technologies
Microsoft
Microsoft Power Platform

One connected platform that empowers everyone to innovate

Build web and mobile
apps and workflows
fast and
without limits
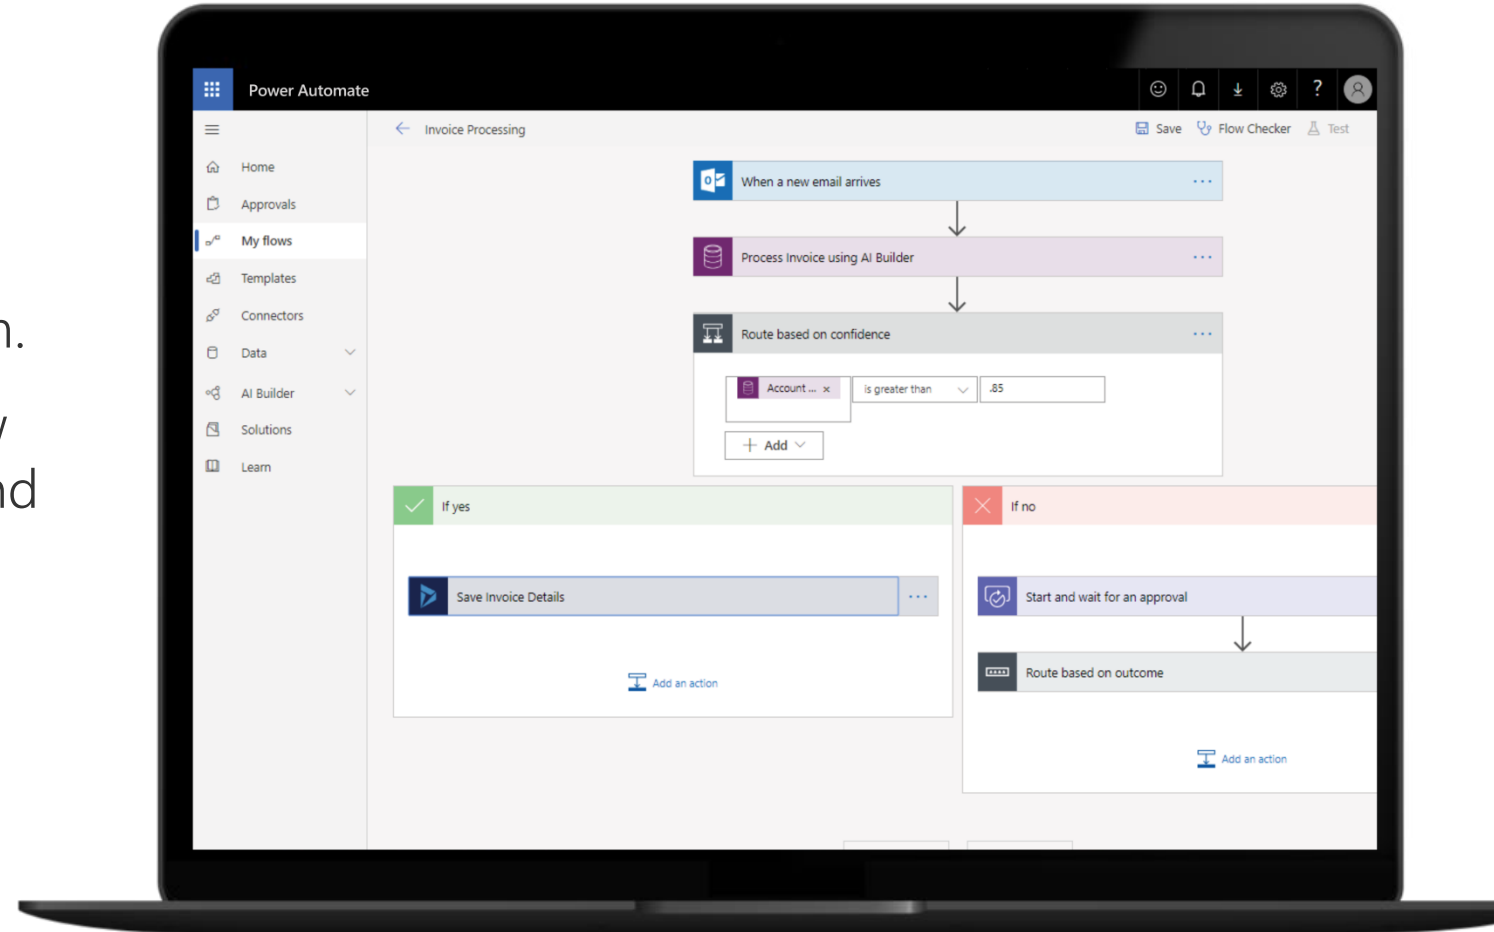

Gain insights from
your data regardless
of where it lives

Enterprise-ready
security and
governance

Agenda

- Close analysis of organization & understanding the business scope.

- We rapidly upgrade your current SharePoint workflow to Power Platform.

- Rapidly evaluate your current workflow and replace it with Power Automate and Power Apps.

Deliverables

- Weekly project overview and plan.

- Data conversion assessment and plan

- Identify which current SharePoint workflow will work for you and have to upgrade to Power Platform.

- Develop an effective strategic implementation plan for next stage.

- SharePoint Workflow replacement to Power Automate and Power App

- Go-live review and post go-live check and solution training
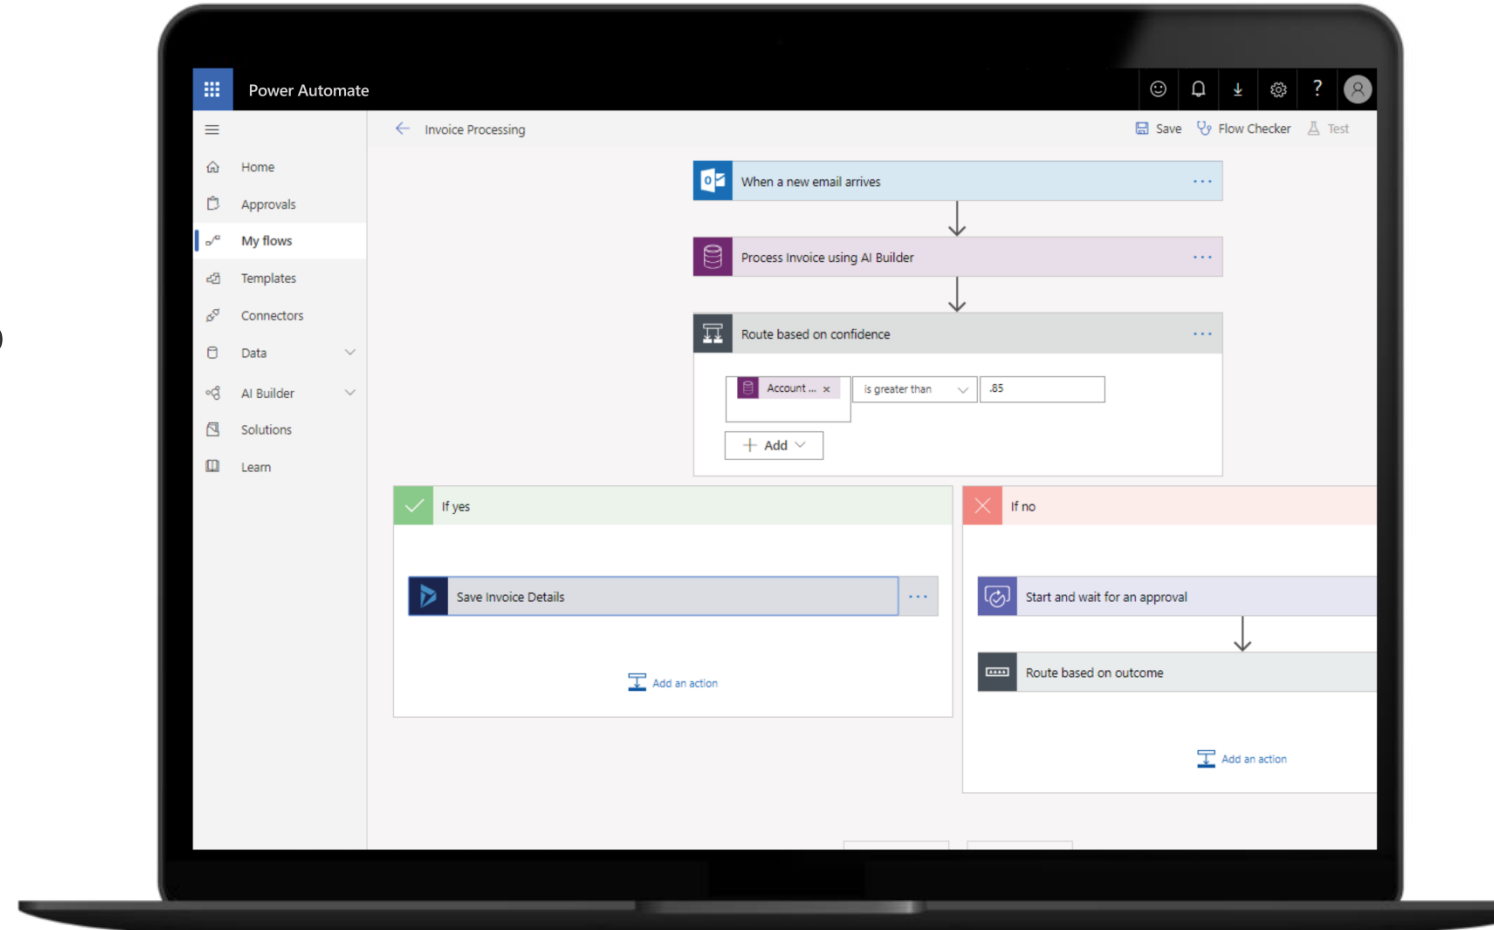

Automate and integrate business processes with Power Automate

- Automate and model business processes across your apps and services

- From simple automations to advanced scenarios with branches, loops, and more

- Trigger actions, grant approvals, and get notifications right where you work

- Automate legacy, on-prem and cloud-based applications and services
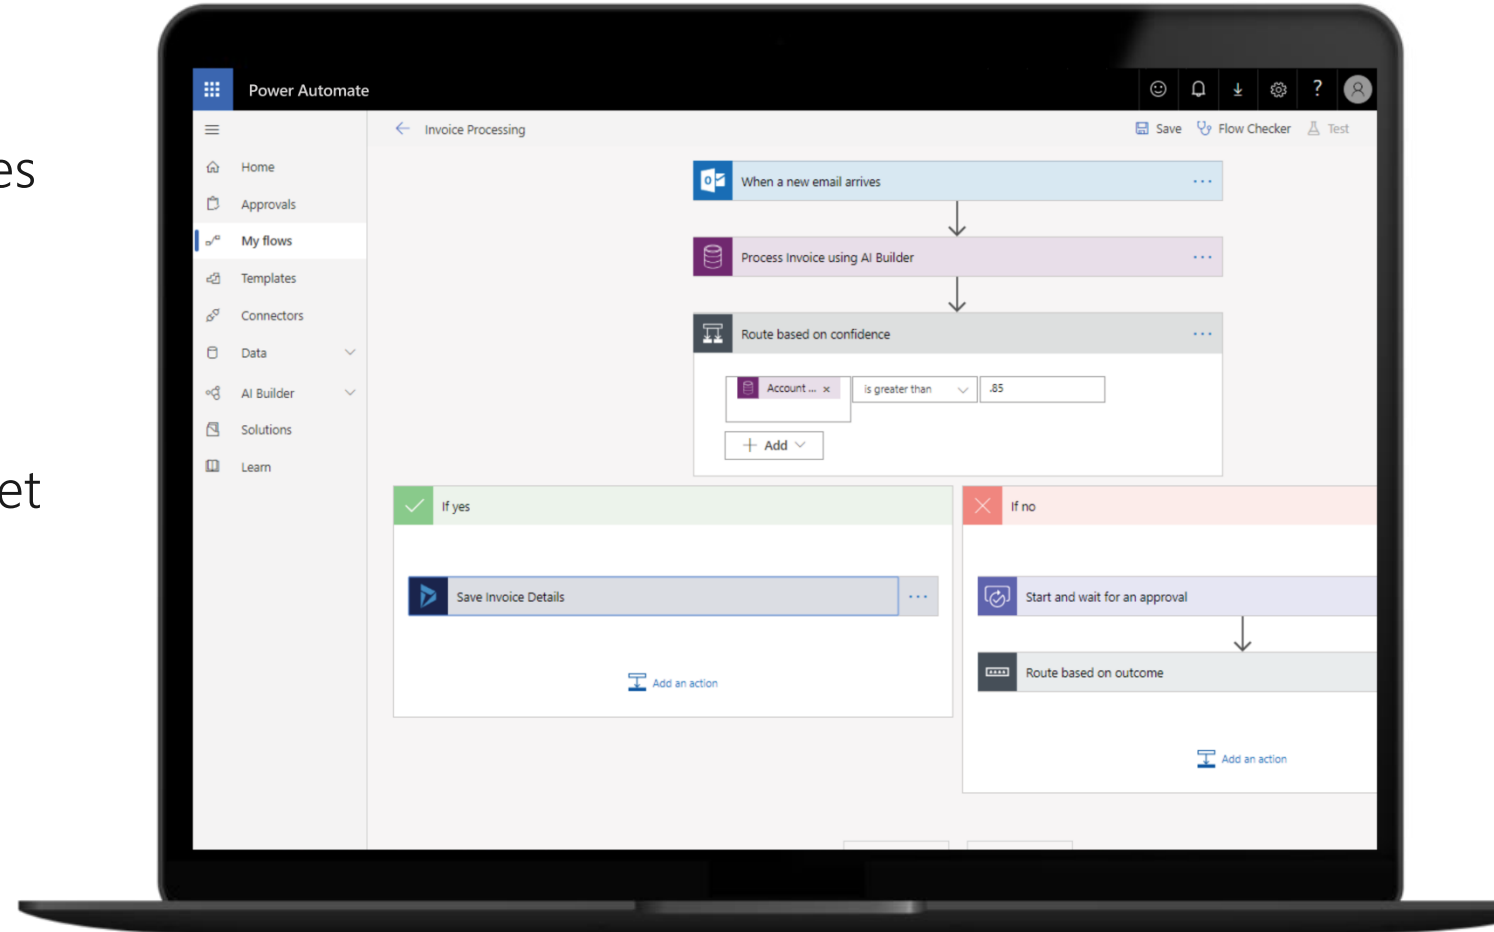

# Build powerful virtual agents with Power Virtual Agents

- Enable subject matter experts to easily create powerful virtual agents using a guided, no-code graphical interface—all without the need for data scientists or developers.

- Enable the virtual agent to take action on the customer's behalf. Easily integrate your virtual agent with hundreds of services and systems out of the box or create custom workflows.

- Keep an eye on how your virtual agent is performing by using conversational metrics and dashboards. Get in-depth AI-driven insights to improve bot performance.
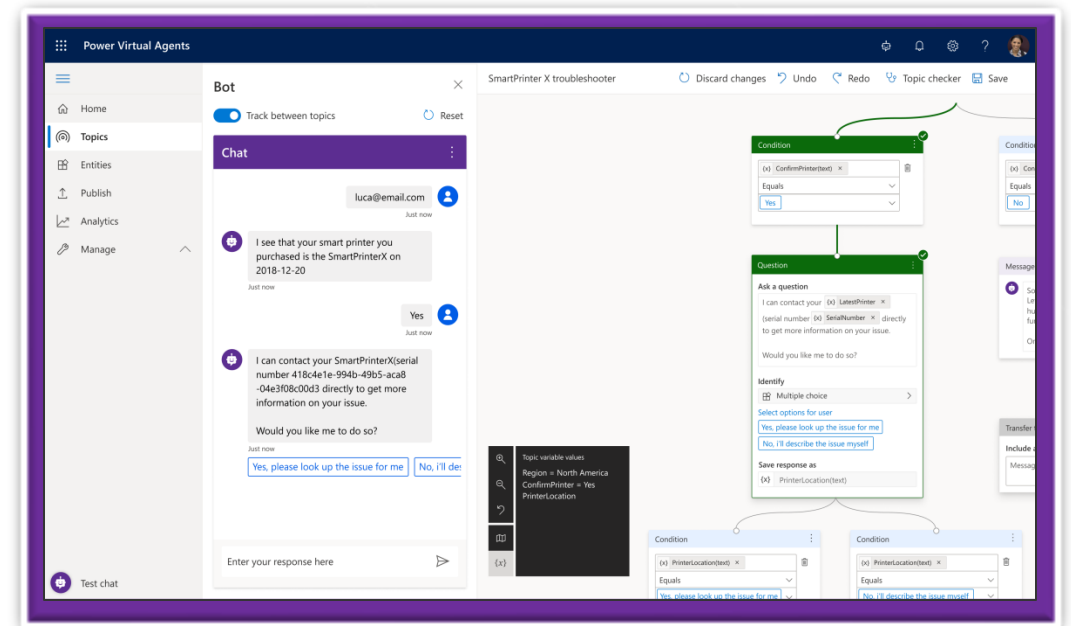

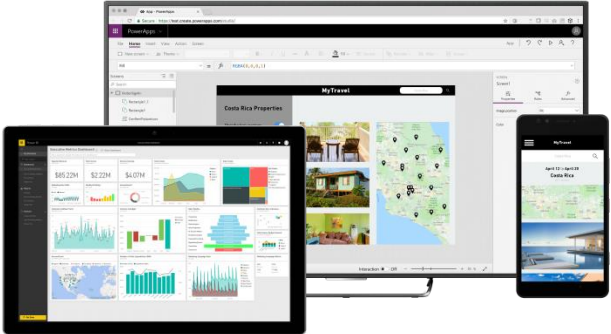

Customize, extend, and build all the apps you need

Seamless Dynamics 365, Office 365, and Azure integration along with connectors to more than 200 data sources
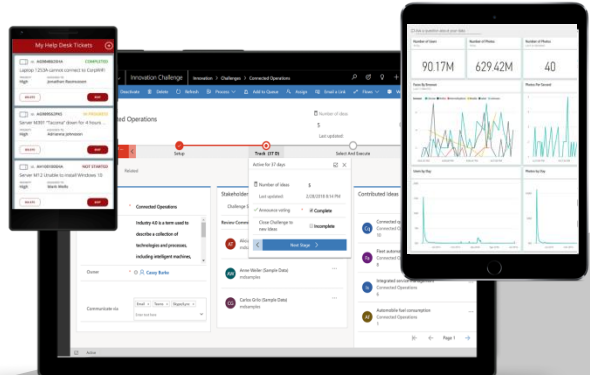

Tailor out-of-the-box solutions, embedded forms and dashboards
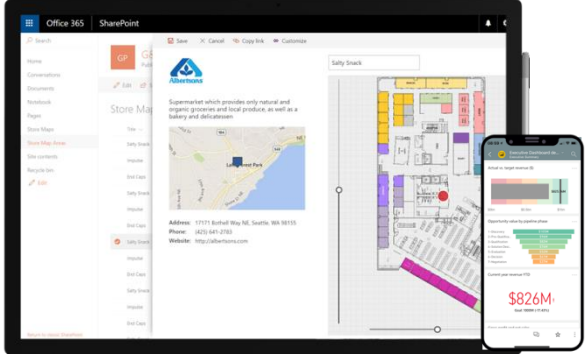

Highly customized task- and role-based apps

Immersive, end-to-end solutions

SOPHISTICATION

Enterprise-grade management and control

- All identity is managed through Azure Active Directory, enabling rich policies and multi-factor authentication

- Admin Center providing full audit logs, usage analytics, data loss prevention, security and data management

- Centrally manage all your apps, first and third party, deployed across your organization

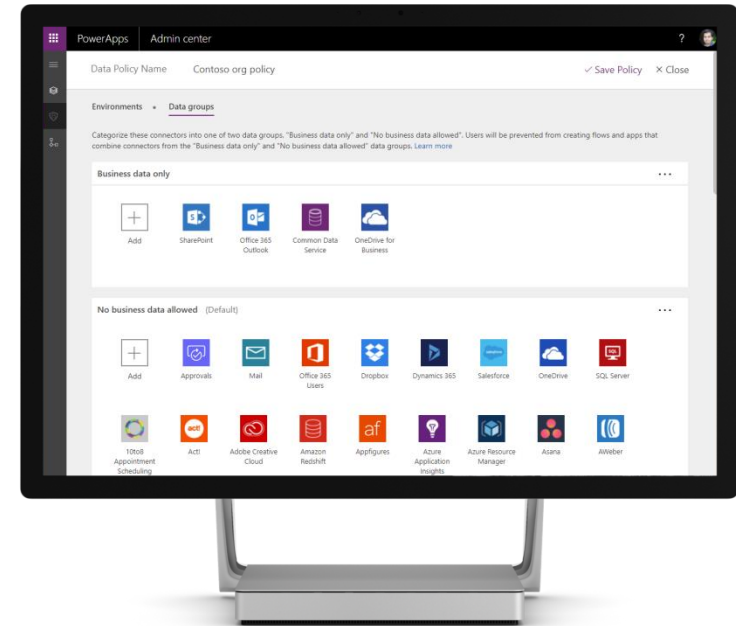

Enterprise-grade   Cloud and on-premises connectivity   Pro-developer extensibility

Cloud and on-premises connectivity

- Built-in connectivity to over 270+ cloud services, files, databases, web APIs, etc.

- Seamless hybrid connectivity to on-premises systems via the On-Premises Data Gateway

- Build custom connectors for everyone to leverage
