HPE POINTNEXT SERVICES

Accelerate DevOps
A Roadmap based on industry best practices and expertise

The HPE DevOps Roadmap for Cloud leverages our experience and IP curated through hundreds of successful enterprise cloud transformation engagements

What is HPE DevOps Roadmap for Cloud - Improvement?

HPE DevOps Roadmap for Cloud – Improvement service assesses the current or planned automation toolchain, delivers a DevOps level-setting presentation, assesses a small set of CI/CD use cases and technology stacks, defines what best practices looks like and the changes need to existing tools, and creates a roadmap for DevOps improvement.

Why customers use HPE DevOps Roadmap for Cloud

This DevOps Improvement service is one of three DevOps offers that provides:

- An Assessment of current DevOps tools and capability (this service)

- A capability and maturity rating based on industry best practices using our DevOps Maturity Model

- A DevOps Roadmap for improvement

- Education on DevOps

DevOps Improvement (This offering)

- A limited set CI/CD use cases and tech stacks

- What does best of bread look like

- Rapid delivery and proof case roadmap

Focus: Existing tool chain

DevOps Transition (additional offering)

- Business unit CI/CD use cases

- Basic SDLC Process re-engineering

- Project management

- Project change communication

Focus: Business Unit

DevOps Transformation (additional offering)

- Enterprise CI/CD use cases

- End to end value steam analysis and process re-engineering

- Program management

- DevOps communication plans & more

Focus: Enterprise

"We struggled with implementing and adopting DevOps in Azure. We engaged HPE and they provided us with a Roadmap for improvement that optimized our Kanban teams and tooling."
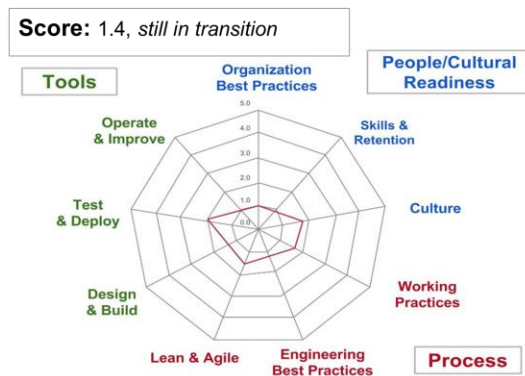

- Global Consumer Goods & Pharmaceutical Company
