## VIRUSFREE

Virusfree.cz is an unrivalled email threat detection service that provides highly effective, intelligent, and trusted email protection. It secures your email against spam, viruses, botnets, ransomware, phishing, whaling and other types of malware and cybersecurity threats.

### WHY VIRUSFREE

Due to the combination of technologies included within Virusfree, the service's threat identification capabilities are ten times more accurate than other email security solutions.

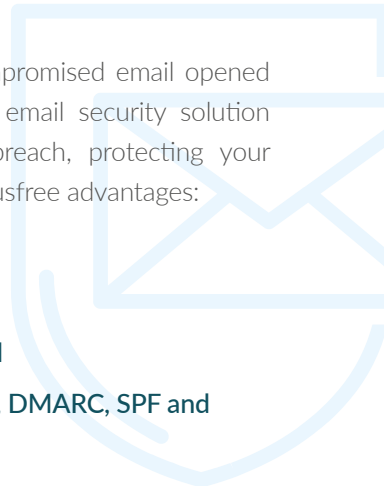

Virusfree employs a multi-layer filter to guarantee accuracy and reduce the possibility of mistakes and missed detections to a minimum. The service also utilises a unique AI botnet detector that assists in the identification of malicious IPs.

### MAIN ADVANTAGES

Many security breaches originate in a compromised email opened by an unsuspecting employee. The right email security solution minimises the possibility of a security breach, protecting your organisation from attack. Here are main Virusfree advantages:

- **7 days email archiving**
- **Solve your spam problem**
- **Minimum risk of losing legitimate email**
- **Secure company reputation (with DKIM, DMARC, SPF and TLS encryption)**

## **VIRUSFREE.CZ IMPLEMENTATION**

Using cloud technology, Virusfree can be implemented quickly and simply. As it is not platform dependent, activation is hassle-free and easy. There is no need for installation and no long wait times. If you're interested in finding out how the service operates, it's possible to sign up for our free 14-day trial.

## **OUR SERVICES**

- Incident analysis forensics
- Vulnerability assessment
- Data Feeds
- Penetration testing
