

# Modernise your applications to maintain your business edge.

Increase your organization's agility by Application Modernisation with Arinco

**YOUR BUSINESS IS POWERED BY APPLICATIONS BUT ENTERPRISES ARE OVERLOADED WITH NO ROADMAP TO UNLOCK THEIR STAFF TO BUILD FASTER, BETTER PRODUCTS.**

## **APPLICATION MODERNISATION WITH AZURE APP SERVICES**

Application Modernisation aims to tackle the problem by taking advantage of cloud native capabilities like improved resiliency, global scale or maximum agility on services that are built from the ground up and optimised for cloud scale and performance. With Arinco's expertise in Application Modernisation, we will work with your business to develop a clear roadmap for migrating to Azure App Services and take those first steps to refactor your Digital ecosystem to take advantage of the cloud.

### **WHY CUSTOMERS USE THE APPLICATION MODERNISATION ON AZURE ACCELERATOR**

This 2-week engagement is relevant for you if you:

- Have Application Infrastructure that is difficult to scale, has a high operational overhead, and an application team that are yearning to learn and grow
- Want a faster release cycle driven by DevOps and agility in the platform they are hosting on
- Wish to accelerate your adoption of Azure Cloud Native Solutions
- Want a roadmap to refactor Legacy Applications to Azure App Services
- Have a line of business app you want to unlock from its present constraints

#### **DESIGN AND EVALUATE**

Understand best practices for Application Modernisation and where to take advantage of managed services

Identify line-of-business applications and align them with the 5 R's of Digital Rationalisation via Azure App Services

Understand which applications would deliver the highest business benefit for modernisation and cloud native hosting

#### **DEPLOY AND INTEGRATE**

Deploy Arinco's Application Modernisation accelerator

Migrate applications into Azure's rich cloud native services with a DevOps led approach

Integrate Azure's Cloud Native platforms into line-of-business applications

Accelerate adoption of Azure's Cloud Services to empower your developers to focus on what matters – code.

#### **MONITOR AND REPORT**

Transition from development to operations

Monitor, report and operationalise your Azure App Services Environment

Identify areas of improvement and create a roadmap for your Digital Estate

Manage, operate then plan for the further deployment of Azure Application Modernisation for the next line-of-business applications

Arinco believe that Intelligence, whether it be Artificial, Augmented or Human - **is the core to the success of any business.**
