

Customer Success Story

Life Is On

Schneider
Electric

Edifixio's scope is to handle 24*7 Managed Services, covering infrastructure monitoring, and first level application support. The key advantage of the power of Azure combined with Edifixio's Managed Services is to give maximum flexibility and freedom to the application developers, to serve their business and users.

Win Results

The target of this design is to get maximum flexibility and availability of the cloud infrastructure at the right costs.

With built in analytics component the system is able to detect PV modules that are not connected, soiling on modules and predict the solar energy generation.

Give maximum flexibility and freedom to the application developers, to serve their business and users.
