## What is PHTPlus?

PHTPlus is a powerful enterprise resource planning (ERP) business software solution specifically designed for the Plating, Heat Treating, and Finishing Services industry. PHTPlus is built for the outsourced manufacturing service company who specializes in finishing services such as plating and coating. This solution is intended to work the way you do. It is for companies like yours that receive customers' parts, perform a process on those parts, and then send those very same parts back to the customer.

PHTPlus is different because it has been designed from the ground up to automate and streamline processes. Our solution is a strong all-in-one ERP software that provides not only traveler (work order) tracking, routings and manufacturing; but so much more including a fully integrated chart of accounts, general ledger, accounts receivable, accounts payable, sales, purchasing, light CRM, reporting, and much more.

PHTPlus is a powerful yet flexible solution that can be designed to meet your business needs from receipt of items to shipping, traveler creation to completion. Ask us how we can customize PHTPlus to meet your company's needs.

## Reasons to Choose PHTPlus

- ◇ Available as a cloud-based hosted solution that requires no hardware or other infrastructure besides connectivity
- ◇ Use our unique industry-specific RapidLaunch process to be LIVE in 60 days
- ◇ Fixed price setup, training and other installation services so there are no surprises
- ◇ Convert your existing data so you don't have to re-key records
- ◇ Affordable and flexible pricing options
- ◇ On-going support program that provides unlimited support
- ◇ On-line support database and training courses available at no additional charge
