About Us

Visionet Systems, Inc. is a full-service technology consulting and digital business process management company that delivers best-in-class software solutions to help our Fortune 2000 customers across the US increase operational agility, drive down costs, and reduce business risk. Our global team has a 23+ year track record of helping clients realize their strategic goals and gain a competitive edge using digital technologies and an innovative onshore-offshore hybrid delivery model.

Visionet's core expertise includes enterprise resource planning (ERP) and business applications, business intelligence and analytics, portals and collaboration, eCommerce and mobility, and enterprise application integration (EAI). We have developed and implemented high-performance solutions for some of the world's best-known brands across several industries, including banking and insurance, retail and apparel, consumer packaged goods, manufacturing, and distribution. We are committed to exceeding customer expectations and delivering extraordinary value.

Geographic Expansion

Industry Expertise

Visionet's services and solutions enhance business processes in every major industry. Our subject matter experts and technology specialists possess in-depth expertise in all industries and government organizations. We offer a portfolio of industry-specific solutions designed to help our clients use technology and outsourcing to improve business performance.

Visionet's industry practice groups collaborate with clients to design and develop high-ROI, purpose-built solutions that address their specific requirements. Our high-quality unified solutions combine industry expertise, technology, and outsourcing services to deliver exceptional value.

Financial Services

Visionet leverages its extensive domain and technical expertise to deliver solutions to financial institutions across the globe. We have emerged as a recognized technology provider to the US mortgage and banking industries. Our comprehensive range of solutions help financial institutions improve operational efficiency, customer retention, and regulatory compliance.

Urban Lending Solution

Energy and Utilities

Aging infrastructure, competitive pressure, supply chain obstacles, stricter regulatory controls, and higher consumer expectations represent major challenges for the energy sector. However, innovative digital solutions address these complexities and help energy businesses establish new revenue streams while putting their best – and greenest – foot forward. We apply our expertise to help clients optimize operations and introduce more customer-centric processes.

Service Offerings

Achieving business success requires a superior strategy to support your quality products. Visionet's services help businesses execute their vision using intelligent technologies and the most stable global talent pool in the industry.

ERP and Business Applications

As a Microsoft Gold partner, Visionet is highly experienced in providing end-to-end solutions for the Microsoft Dynamics family of ERP platforms. We leverage Microsoft-approved best practices and industry-focused frameworks, which enables us to efficiently and cost-effectively deliver high-performance solutions.

Cloud Enablement and Enterprise Integration

With strong partnerships with Microsoft and Amazon, our cloud experts help organizations transition to and optimize their cloud operations on Azure and AWS. Combining our holistic integration consulting services with industry-adopted platforms such as Software AG's WebMethods, Microsoft's BizTalk, and IBM's BPM, Visionet helps its clients craft and deploy robust information architecture that realizes real-time data integration between disparate systems, and enables end-to-end business process automation and high data integrity.

Data Science, Advanced Analytics and AI

Visionet's service model offers high-performance, scalable BI and analytics solutions. Our data scientists determine the best models for predictive analytics, and our machine learning experts use cutting-edge techniques to ensure your forecasting capabilities improve over time. Our team is well-versed in multiple BI technologies and data warehouse platforms, and our global delivery footprint helps us execute effectively at the best overall cost.

Digital Commerce

Visionet offers a full range of B2C and B2B eCommerce capabilities, including CRM, mobility, social analytics, and personalization. Our team of dedicated professionals has vast cross-industry experience in the strategy, visual design, development, implementation, execution, management, and administration of innovative digital commerce solutions.

Robotic Process Automation

Over twenty years of experience in process automation has given Visionet a solid foundation for applying robotic process automation (RPA) to client use cases. By training and inserting highly affordable software agents into existing digitally driven business functions, our RPA specialists help you achieve a tenfold increase in productivity in weeks, not years.

Portals and Collaboration

Visionet specializes in Microsoft SharePoint, the industry-leading collaborative platform. Using a strategic approach coupled with the right set of skills and knowhow, we have executed many large-scale portal and collaboration projects for a variety of clients and industries.
