

CDW SERVICES:

ARCHIVING ON-PREMISES DATA TO AZURE STORAGE

TAKE CONTROL OF YOUR STORAGE NEEDS EASILY AND EFFICIENTLY

The amount of data that is being archived is growing exponentially every year, and organizations are under increasing pressure to provide storage for all of it. Microsoft Azure has become an attractive option for organizations to right-size their storage. Azure is becoming the right solution for more and more enterprises for providing unlimited storage capacity without having to buy disk or fiber. Azure Storage provides a relief from the need to continuously purchase additional storage devices. Your data archived in Azure is highly available and recoverable, so you can access it when you need it. Additionally, depending on your requirements, you have multiple replication options for your Azure storage to ensure your desired level of redundancy.

Your path to an optimized storage solution begins with CDW's Archiving On-Premises Data to Azure Storage service.

WHAT CAN CDW DO FOR ME?

CDW will assist your organization in enabling an archival solution in Azure, which does not require the purchase of hardware. We will consult with various stakeholders within your organization during the planning and design portion of the engagement.

A highly skilled CDW engineer will create a resource group if necessary, and then create an Azure Storage account and upload up to 10GB of data files to the storage account from Windows or Linux as requested.

THE BENEFITS

- Azure Storage is highly scalable and can keep pace with your growing data needs
- Ensure that Azure Storage is deployed and configured according to best practices
- Achieve peace of mind knowing your data is automatically replicated to protect against unexpected hardware failures
- Reduce capital expenses by ending the need to add storage infrastructure to support business demands

WHY CDW?

CDW is uniquely qualified to design IT solutions that remove complexity and unnecessary costs from your organization. Our experts become part of your team providing the support you need, when and where you need it.

We can help you navigate Microsoft's robust array of solution offerings, including Microsoft Azure Storage. CDW is an end-to-end provider of cloud applications, solutions and services in public, private and hybrid cloud environments. Based on your business demands, we can help you plan, deliver and manage a flexible cloud solution tailored to your needs. We offer best-of-breed providers, risk mitigation strategies and dedicated, personalized expertise to deliver economic and operational benefits.

We get Microsoft Azure. And we can share our knowledge with you, so your organization can spend less time managing software and more time putting it to work.
