CDW SERVICES:

MICROSOFT AZURE STACK PROOF OF CONCEPT

AZURE STACK CAN HELP YOU RUN HYBRID APPLICATIONS ON-PREMISES

The Data Center is changing rapidly and there are many options where to host your applications and data. Should you use a public cloud, keep things onsite, or use a mix of both? Are you exploring options to host custom applications or servers for your customers? Azure Stack is the platform for delivering Azure services without using the public cloud. The Azure Stack Proof of Concept (PoC) engagement will help accelerate a deployment to a public, private or hybrid cloud that is hosted on Azure but onsite. Evaluate Azure Services for an application development project without investing in a full Azure Stack solution. The Azure Stack Development Kit is a single-server solution to evaluate the features and services of Azure on-premises. The Azure Stack PoC will provide:

· Azure Stack services overview

· Environment assessment

· Set up the Azure Stack Development Kit

· Configure common services for IaaS and PaaS

· Deploy SQL or MySQL Database services

· Integrate your application development process

· Overview of Marketplace and Management features

WHAT CAN CDW DO FOR ME?

Some of the products and tools covered for Azure Stack include:

· Azure Stack

· Infrastructure as a Service

· Platform as a Service

· App Services

· SQL Database Services

· Azure Marketplace

THE BENEFITS

· Integrate Azure Stack into the development process

· Evaluate Azure Stack for a production deployment

· Learn best practices on deployment, management and integration

· Accelerate adoption of Azure Stack in a private or hybrid cloud model

WHY CDW?

CDW is uniquely qualified to design IT solutions that remove complexity and unnecessary costs from your organization. Our experts become part of your team providing the support you need, when and where you need it.

We can help you navigate Microsoft's robust array of solution offerings, including Azure. CDW is an end-to-end provider of cloud applications, solutions and services in public, private and hybrid cloud environments. Based on your business demands, we can help you plan, deliver and manage a flexible cloud solution tailored to your needs. We offer best-of-breed providers, risk mitigation strategies and dedicated, personalized expertise to deliver economic and operational benefits.

We get Microsoft Azure. And we can share our knowledge with you, so your organization can spend less time managing software and more time putting it to work.
