

Creating an actionable roadmap to transition your operating model to be cloud-ready.

- **Strategic Alignment** – Develop cloud vision and principles that align with your business strategy.
- **Cloud Operating Model** – Get expert advice on best practices to transition and modernize your operating model for cloud.
- **Actionable Roadmap** – Create an actionable roadmap to accelerate cloud transformation and operational readiness.

Adopting Cloud does not just involve technology. Organizations must adapt their people, process, technology and operations to support the new world of Agility, IT Efficiency and Innovation.

Organizations new to cloud adoption, or need help accelerating their journey can take advantage of the **Cloud Adoption Framework Roadmap**, a consulting engagement that help organizations understand how to transform their operating model to successfully adopt the cloud.

We help them build an actionable roadmap they can follow to prepare them for their cloud transformation journey.

Holistic understanding of risk impact and capability gaps

We take a holistic approach by assessing capability gaps and the risk impact across different areas of the Cloud Operating Model, such as organizational structure, governance, process optimization and cloud tooling and architecture.

Understand areas to improve for risk resilience.

Improve operational readiness and efficiency

Operations is a key topic discussed in this engagement, and we ensure that the organization understands how to avoid or eliminate unneeded costs, and improve their operational processes.

More seamless transition to cloud operations.

Why Customers Use the Cloud Adoption Framework Roadmap:

- Improve strategic alignment
- Develop an actionable plan to accelerate cloud transformation
- Improve cloud readiness, business agility and innovation
- Ensure people, process and technology are setup to succeed in the cloud
- Minimize disruptive impact of cloud transformation

Minimise the disruptive ripple effect of cloud transformation

We incorporate input from different stakeholders that will be impacted by cloud (IT, Security, Finance, HR) into our roadmap, which outlines recommended initiatives that can be implemented to deliver changes across the organization.

More scalable delivery and management of change.

We help organizations understand the changes required to transform their operating model to be cloud-ready.

Discovery and Analysis

- Understand the wider IT transformation piece and potential business impact of the cloud
- Identify main business drivers for adopting the cloud
- Understand customer expectations
- Stakeholder Discovery Workshops: Assessment of the operating model across people, process and technology based on specific assessment areas, such as Infrastructure, Application, Security, Finance, Data and Operations.

Roadmap Build and Presentation

- Create the following assets to help modernize the organization's Cloud Operating Model:
 - Cloud Adoption Framework Roadmap (diagram)
 - Analysis and Recommendations (document)
 - Executive Summary (presentation)
 - Supporting Documents
- Present Executive Summary and Gather Feedback
- Discuss project results and next steps.

Cloud Adoption Framework Roadmap

Our promise to you

We will help you build an actionable roadmap to transition your operating model to be cloud-ready.

An offer to get you started

We will lead strategic discussions across different areas of the business to get a holistic understanding of what needs to change to adapt your operating model for cloud. We ensure you will have a roadmap to follow to deliver these changes across the organization.

Discovery and Analysis

Roadmap Build and Presentation

Customer Benefits

- Improve strategic alignment so business initiatives are tied to a common goal
- Drive change in a faster and more scalable way within the organization with an actionable roadmap
- Improve operational readiness by learning how to avoid or eliminate unneeded costs.
- Improve risk resilience by analyzing the risk impact of gaps in the current operating model.

Why Cloudreach?

We elevate technology and people so you can reach new heights.

Cloud Software

Software designed to accelerate cloud adoption.

Consulting Services

Cloud experts ready to guide to the cloud.

Managed Services

24x7 cloud infrastructure, application, and cost support
