

Microsoft Dynamics 365 Business Central – Manufacturing ExpressLaunch

Length: 3 Training/Service Days + 2 Client Testing Days

Prerequisites:

- D365 Financial Setup must already be complete. See “Financial ExpressLaunch” Service Offering if needed.
- Basic understanding and knowledge of manufacturing processes.
- Dynamics 365 Business Central (Premium) licensing required.

Audience:

Professionals involved in accounting, finance, inventory, manufacturing, project management, distribution, warehouse management, and/or services management who want to gain an understanding of the Dynamics 365 Business Central – Manufacturing Module.

What You’ll Learn:

- D365 Business Central functionality
- Manufacturing settings and configuration choices
- Understand the Item structure and design
- Managing production, consumption, and output
- Production order processing and reporting

We have specifically designed our ExpressLaunch Service(s) to propel your business's capabilities and give you the best path forward with Dynamics 365 Business Central. The D365 software is great for companies who have 10 or even 250+ employees and can be installed as a stand-alone accounting system or the base of a full-service Enterprise Resource Planning (ERP) system. D365 Business Central is a cloud-based system, with no installation required. After you have deployed your environment, the real work will begin.

This 3-day course on the Dynamics 365 (D365) Business Central is for those who are looking to grow your business. Our Manufacturing ExpressLaunch course is helpful as many people want better tracking of their Production Operations. This course will help you to make decisions on how to setup the Manufacturing module.

This RapidStart implementation will guide your business through the functional aspects of Dynamics 365 Business Central's Manufacturing module. We address the three core functional areas of Manufacturing.

The following outline discusses the functional areas of Dynamics 365 Business Central’s Manufacturing Module covered in this engagement.

Product Design (a.k.a. Item Setup)

- Routes (Operations/Activities)
- Bill of Materials (BOM)
- Material/Operation Linking
- Version Management

Production Planning (MRP)

- Planning Parameter Overview
- Finished Good Setup (1 Item)
- Raw Material Setup (1 Item)
- Sub-Assembly Setup (1 Item)
- MPS/MRP Process and Audit

Manufacturing Execution

- Production Order Statuses
- Registering Consumption of Raw Materials/Sub-Assemblies
- Registering Time
- Finished Good Production

Deliverables:

- Path Forward plan to realize production goals and objectives.
- Setup of D365 Business Central's Manufacturing system.
- Training how to best utilize your new D365 Business Central Manufacturing system.

Note:

- Dynamics 365 Business Central (Premium) licensing required.
- D365 Financial Setup must already be complete. See “Financial ExpressLaunch” Service Offering if needed.
