

Take Advantage of Modern Cloud-First Applications

Become Nimbler and Enable Business Agility.

Many IT leaders and executives are feeling hamstrung by their critical line of business applications that are outdated, no longer meet current business processes, or are constantly at risk of breaking. Moving to modern, cloud-first applications will enable your organization to avoid further technical debt, become nimbler, and enable business agility.

Intellinet will help you focus on what you do best – your business – and **ensure that your most critical systems are modern, reliable, and enables you to be agile and competitive.** Using our Pragmatic Design Thinking approach, we work closely with your team to understand your business strategy, unique needs, and desired experiences to recommend and architect the right solution that will enable you take advantage of modern cloud-first applications.

Get Started Today

Whiteboarding Workshop

Understand current landscape and business challenges and define an approach to achieve your goals in the timeframe that is needed.

App Modernization Assessment

Our team will evaluate your chosen app and will apply a human-centric approach to understand desired experiences and develop wireframe concepts, architecture recommendations, and cost estimates for future build and hosting

Portfolio Assessment

Using Intellinet Application Portfolio Management (APM) methodology, our team will evaluate 5-10 applications with qualitative and quantitative measures and will provide recommendations for improvements and best investments.

App Modernization Quick Start

Our team will review a specified problem application or scenario, provide light design with an intentional user experience. You'll walk away with a pilot solution and clear path towards full production.
