# Azure DevOps Solution

Using end-to-end solutions on Azure, teams can implement DevOps practices during application planning, development, delivery, and operations. Apply the right combination of DevOps technologies, culture, and processes to enable continual software delivery and better value for customers.

Plan smarter, collaborate better, and ship faster with a set of modern dev services.

## Azure Pipelines

Build, test, and deploy with CI/CD that works with any language, platform, and cloud. Connect to GitHub or any other Git provider and deploy continuously.

## Azure Boards

Deliver value to your users faster using proven agile tools to plan, track, and discuss work across your teams.

## Azure Test Plans

Test and ship with confidence using manual and exploratory testing tools.

## Azure Repos

Get unlimited, cloud-hosted private Git repos and collaborate to build better code with pull requests and advanced file management.

## Azure Artifacts

Create, host, and share packages with your team, and add artifacts to your CI/CD pipelines with a single click.

Empower teams to manage their work with agility and full visibility across products and projects. Define, track, and lay out work with Kanban boards, backlogs, custom dashboards, and reporting capabilities using Azure Boards. Keep development efforts transparent and on schedule with GitHub. Explore analytics with visuals and turn data into insights with Power BI.

# Azure Dev & Test Environment

You're delivering more features faster—keep up with a comprehensive set of development and testing tools for your team to collaborate and deliver at cloud speed. Quickly create consistent development and test environments on your terms through a scalable, on-demand infrastructure.

## Quick custom templates

Set up your virtual machine with your dev tools and your latest build in a few clicks, and share reusable templates across your team.

## Works with your CI/CD tools

Create environments directly from your continuous integration (CI) tools using our plugins, REST API, or Visual Studio Team Services extension.

## Self-service cost control

Provide self-service cloud environments without the worry. Lab policies and thresholds help to effortlessly minimize costs.

Use DevTest Labs Benefits:

- ☐ Quickly provision development and test environments
- ☐ Minimize waste with quotas and policies
- ☐ Set automated shutdowns to minimize costs
- ☐ Build Windows and Linux environments

# Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

## WHY AZURE

### **BE FUTURE-READY**

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data science tools.

### **BUILD ON YOUR TERMS**

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

### **OPERATE HYBRID SEAMLESSLY**

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90% of enterprises globally.

### **TRUST YOUR CLOUD**

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.
