Global Brands Group

Founded in 1997, Global Brands Group (GBG) commenced operations under a senior executive leadership with local and international experience, who guided a professional team, which collectively exceeded hundreds of man-years of experience.

GB – Cloud HPC Offer

LEARN MORE

Azure High-performance computing (HPC)

- Optimized for HPC workloads. Whether it's fluid dynamics, finite element analysis, seismic processing, reservoir simulation, or weather modeling, run your workloads with maximum performance, scalability, and cost efficiency on Azure.
- Extend your HPC environment to the cloud. Use Azure HPC resources on your terms. Dynamically burst to the cloud to complement your on-premises capabilities, or even fully migrate entire HPC environments and workflows.

InfiniBand bandwidth and latency, with support for RDMA verbs, OFED drivers, and all MPI types and versions, including OpenMPI, MVAPICH2, Platform MPI, and Intel MPI—Azure is the only public cloud to offer InfiniBand

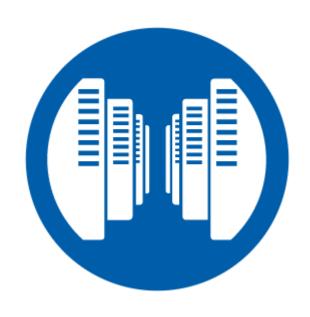

Powerful compute

Extraordinary scalability and versatility with fully managed, dedicated supercomputers from Cray, powerful CPU and GPU virtual machines (VMs), highly capable virtual desktop offerings, and a wide-array of fast, and flexible storage options

Seamless integration

Easily extend existing
HPC resource
environments to Azure—
no need to re-architect
your applications for the
cloud. Use Azure tools to
clone your clusters to the
cloud and manage your
application workflows

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

WHY AZURE

BE FUTURE-READY

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in Al, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data science tools.

BUILD ON YOUR TERMS

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

OPERATE HYBRID SEAMLESSLY

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90% of enterprises globally.

TRUST YOUR CLOUD

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.
