

Strategic Cloud Adoption (SCA) Envisioning

Accelerate your Cloud Transformation Journey

<https://aka.ms/StrategicCloudAdoption>

Accelerate your adoption of the cloud, by creating a tailored Cloud Adoption roadmap.

Shape the cloud journey for your specific needs and context. Avoid known pitfalls.

Leveraging our technology and digital transformation expertise to help remove blockers, overcome challenges, and provide a clear and actionable roadmap on your way to the cloud.

Your team will work in an intensive rapid envisioning style with Microsoft Services architects. Together we will build a roadmap that makes sense for your organization.

This agile and flexible approach brings together proven best practice and cloud adoption patterns with a recognition that no journey is the same for each organization.

Principles

Listen and Discuss

Understand your business objectives and strategy. Prioritize potential scenarios, understand quick wins that meet your business needs. Identify strategic priorities and transformational initiatives.

Educate and Share

Share our expertise guiding and supporting enterprise customers on their cloud journey. Educate and discuss on key topics such as cloud strategy, industry use cases, security, open source and DevOps.

Guide and Plan

Provide guidance on where to get started and how to accelerate to overcome business challenges. Build a joint plan on how to accelerate the digital transformation for your organization.

Scope

Listen

Gain understanding of business objectives and goals

Discover strategy and requirements

Learn about challenges, pain points and current cloud adoption state

Learn

Share our cloud adoption experience, patterns and best practices.

Discuss the most important topics for your organization to quickly and sustainably benefit from cloud services

Plan

Prioritize quick wins, strategic initiatives, transformational wins

Identify desired outcomes and impacts

Build a joint cloud journey

Next Steps

Agree the long-term vision and roadmap of initial next steps your organization will prioritize as part of your cloud strategy

Agree next steps and how Microsoft will partner on your journey

Sample SCA Envisioning Agenda

Cloud Strategy

Discuss and shape the digital strategy that drives and enables digital transformation and disruptions. Identify the vision and target state for your organisation

Strategic Cloud Adoption

Share the Microsoft approach and how Cloud Strategy requires a considered execution across multiple technology areas, but also people and process.

Cloud Adoption Framework

End-to-end cloud adoption journey leveraging frameworks, different migration approaches and cloud architects and strategy teams.

Your Context

What are the specific adoption blockers and opportunities for your organization.

Data in the Cloud

What are your tactical and strategic options when moving to the cloud. How do you enable new data led business models while maintaining legacy data solutions?

Infrastructure in the Cloud

How do we build secure, high performing platforms in the cloud?

Applications in the Cloud

How do you migrate applications to the cloud. How do you start building cloud native applications now? How do you equip your development teams to take advantage of the benefits of cloud services?

IT Delivery in the Cloud

How do you organize your IT functions in a way that can react to the need for speed and scale in the Cloud?

Microsoft Services

Scale your solutions easily

We have the worldwide presence to evolve your project from a small pilot to global solution

Maximize your data and system security

We have a team of over 3,500 cybersecurity experts committed to meeting your security needs

Leverage the Microsoft ecosystem

We assemble the right group of experts and partners for every project

Work with a group who understands your business

We have a track record of working with large, global organizations to overcome unique challenges

Benefit from ongoing support

We deliver results that last with integrated, end-to-end support across the solution lifecycle

Collaborate with product experts

We connect with the teams that design and build Microsoft technology
