Business Process Enhancement Using Power Platform: 2-Hour Consultation

In an increasingly remote-driven workplace, organizations are looking for ways to automate cumbersome and time-consuming activities. Our team of experts will review your business processes to highlight how the best offerings in Microsoft Power Platform can improve your productivity.

Agenda:

1. Evaluate your existing business processes and pain points
2. Discuss automatable scenarios, use cases, and limitations
3. Check the feasibility of automation through Office 365, MS Teams, SharePoint, Power Apps, Power Automate, Power BI, and CDS
4. Create implementation road maps and set solution-based expectations

Deliverables:

After the assessment, you will have the following:

1. Power Platform Educational Briefing
2. Identification of Power Platform opportunities and value-adds
3. Demo of similar implementation
4. Long-term strategy and implications
5. Licensing options, costs, and governance recommendations

About MAQ Software:

MAQ Software is a Microsoft-Preferred Supplier for Power BI. We were early adopters the Power Platform suite. Since its inception, we have developed applications and automated business processes using Power Apps, Power Automate, and Power BI.

We have:

- Delivered over 50 Power Apps
- Automated various business processes using Power Automate for Fortune 500 companies
- Engaged with enterprise-wide implementations using Power Portal
- Integrated Power Apps into Teams and SharePoint sites

Receive counselling support from one of our Microsoft FastTrack-recognized Solution Architects.

Note:

1. This assessment will require us to collaborate with business analysts, business leaders, and other stakeholders within your organization
2. This assessment will be conducted via Microsoft Teams or conference call, unless an in-person meeting is feasible
