Cloud Backup Assessment

Leveraging Veritas NetBackup and Microsoft Azure for advanced data protection

Market overview

Challenges

- Enabling cloud-based backup and disaster recovery capability

- Reducing CapEx

- Migrating to OpEx model

- Organizations must transform both infrastructure and service delivery

Proof

IDG Survey: Leveraging new technology platforms one of top two priorities for IT

Ideal solution

- Off-site retention and vaulting in a secure hybrid environment

- Cloud Backup Assessment that enables Microsoft® Azure® + Veritas™ NetBackup™ and CloudCatalyst solution

Proof

Clients seeking ways to use public cloud as powerful extension to data center platforms for secure off-site backup and DR

Desired outcomes

- Cloud Backup Assessment compiles/ clarifies data needed to make well-informed decisions impacting operational resiliency

- Deliverables:
  - Detailed information on current-state
  - ROI analysis for moving to cloud
  - Strategic guidance on improving infrastructure
  - Comprehensive tactical recommendations

Proof

Clear, concise, complete assessment enables organizations to move forward with confidence

Insight® | Cloud + Data Center Transformation

CDCT Cloud Backup Assessment

Helping clients capitalize on cloud-based backup and DR

Cost efficiencies

Eliminate:

- Storage facilities for tapes or off-site data

- Tape management and retention processes

- Expensive replication infrastructure

Operational resiliency

- Protection from system failure or data corruption

- Readily accessible data

Infinite scalability

- Unlimited resources in the public cloud

- Easily updated private cloud

Insight® Cloud + Data Center Transformation

Cloud Backup Assessment produces blueprint for using Microsoft Azure, Veritas NetBackup, and Veritas CloudCatalyst to streamline and simplify off-site retention and vaulting in secure hybrid environment.

The result: Cost efficiencies, operational resiliency, unmatched scalability – and peace of mind.

Why CDCT?

25+ years of innovation in all aspects of data center transformation

- Cloud strategies and execution

- Advanced data protection planning and execution

- Business to IT alignment consulting

- Data center design and consolidation

- Data center relocation planning, management, and execution

- Data, infrastructure, and application-focused migrations

- Outsourcing and managed services strategies

Ensuring data storage and protection strategies align with business needs

- Data continuity assessments

- Backup assessments

- Backup monitoring and reporting

- Capacity assessments

- Disaster Recovery Options and Whiteboard

- Cloud Networking Assessment

- Workload Migration Strategy Discovery

Powerful synergy with technology leaders

Microsoft

- Largest Azure partner
- Microsoft Azure Circle Partner
- Dedicated team of Azure technical solution advisors
- No. 1 Office 365® net cloud seats sold

Veritas

- Platinum Expert status
- 200+ Veritas-specific certifications
- 50+ subject matter experts across Veritas solutions
