

TFS to Azure DevOps

Migration Made Easy

Your Dilemma: ???

How do you migrate from TFS to unlock the benefits of Azure DevOps but still deliver business as usual?

Benefits of Azure DevOps

Azure DevOps allows you to deliver more, faster.

Any Language

All code is treated equally! Use the language that is right for you. This is not just for .NET code running on Windows!

Any Cloud

Teams that adopt the essential characteristics of cloud are **23x more likely*** to be elite performers

*State of DevOps report 2018

Any Platform

1/3 of virtual servers on Azure run Linux

Global availability

Immediate access to latest features

Simplified Azure deployment

Focus on delivering value

What are your migration options?

The **end of mainstream support** for TFS will see your operational **risk** increase

We've developed **bespoke tooling** and have **in-depth experience** migrating to Azure DevOps. We are your **quickest** and your **lowest risk** option

We'll **collaborate** with you **from the very start**, to establish your requirements. Then our **experienced engineers** will execute the rest

We'll deliver a fully functioning Azure DevOps implementation with all the agreed objects migrated.

Our Approach:

Workshop:

We identify the best migration approach for you

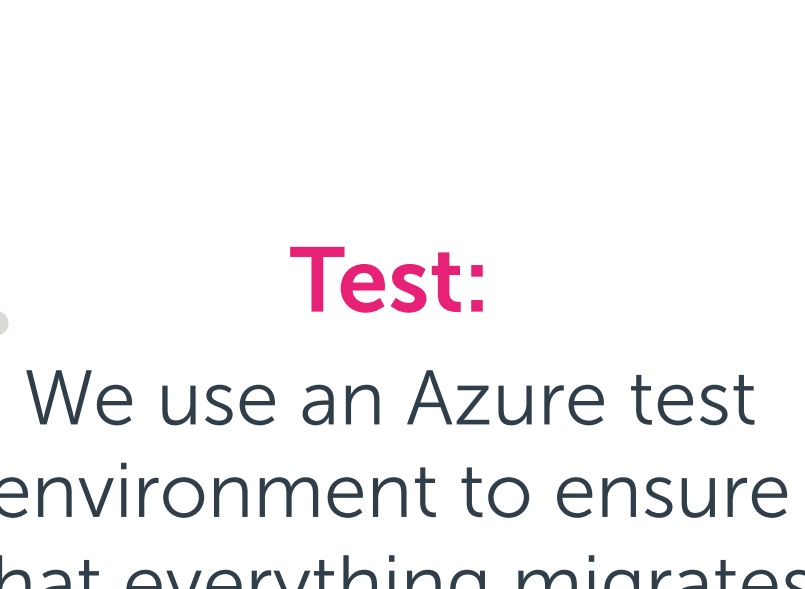

Plan:

Identify exactly what will be migrated including: source code, work items, builds, etc

Migrate:

Migration to Azure DevOps is performed

Test:

We use an Azure test environment to ensure that everything migrates as expected

Urgent?

If needed, we can complete this within **2-4 weeks**

Don't take our word for it...

“Immix is our flagship product and it was vital that its migration to Azure DevOps was handled with **care** and **expertise**. **DevOpsGroup delivered on both counts.**”

Mark Kenna, CS Product Manager at SureView Systems
