

DevOps as a Service

Solution Brief

We manage Microsoft Azure for you

Speed adoption, fuel innovation and reduce operational risk—CloudOps provides a multi-cloud capable DevOps platform that keeps your cloud options open.

We help assess, implement and operate DevOps practices like Continuous Integration/Continuous Delivery and cloud technologies like Docker and Kubernetes.

Building and running a cloud operations team is challenging

- High demand of time and costs
- Hard to find expertise and to create cultural fit
- Difficult to retain talent
- Cost of doing it wrong can be high

Focus on innovation, we'll support your 24/7 operations

We provide an experienced team, 24/7, to monitor and can support the day to day operations of your application platform on Azure.

CloudOps provides a SOC 2 compliant platform and experienced team for:

- Monitoring
- Backups
- Logging
- Disaster recovery options
- Support services
- CI/CD
- Application platform patching
- Identity and access management

CloudOps offers a fully managed solution or augmented support for your application platform.

Automation/DevOps

Automation used for remediation, scaling, in-flight audits and maintenance

24x7 Expertise

Incident response and change management for your application platform

Visibility

Shared visibility into business and technical metrics

CloudOps is a cloud consulting and services company focused on open source, cloud platforms and networking. We help businesses thrive in a data driven software economy with successful adoption and operation of cloud platforms, enabling self-service, utility economics and API-automated, continuous delivery of IT.
