

CDW SERVICES:

MICROSOFT AZURE SITE RECOVERY FOR DR

PROTECT YOURSELF WITH A SOUND DISASTER RECOVERY SOLUTION

The Azure Site Recovery for DR engagement offers organizations the opportunity to provide disaster recovery for a select set of servers. Using services in Azure, on-premises physical or virtual servers can be replicated to Azure. Also, using the same services, Azure virtual servers can be replicated to another Azure region. In the event of an on-premises or Azure region loss of services, the replicated servers in Azure can be brought online, restoring services for your organization.

WHAT CAN CDW DO FOR ME?

Prior to the workshop, CDW will lead a discussion and whiteboarding session focused on a solution chosen by your organization for deployment in Azure. The DR using Azure Site Recovery Workshop session may include the following:

Current Environment review

- Active Directory Domain Services ("AD DS")
- Server virtualization
- Networking
- Management and monitoring tools
- Current strategy for DR
- Capacity planning

Azure Site Recovery

- Introduction
- Azure basics
- Disaster Recovery protection methods
- Replicate Azure VMs to another region
- Compute (Azure Site Recovery)
- Applications (e.g., SQL, SharePoint)
- Active Directory
- Load balancing
- Failover/failback

Following the workshop, CDW consultants will assist your organization in deploying Azure Site Recovery to protect your servers, and will assist in running a test failover to ensure functionality.

THE BENEFITS

- Provide technical guidance for the design of Azure Site Recovery
- Build and test the Azure Site Recovery solution
- Ensure that the deployment of Azure Site Recovery adheres to current best practices

WHY CDW?

CDW is uniquely qualified to design IT solutions that remove complexity and unnecessary costs from your organization. Our experts become part of your team providing the support you need, when and where you need it.

We can help you navigate Microsoft's robust array of solution offerings, including Azure. CDW is an end-to-end provider of cloud applications, solutions and services in public, private and hybrid cloud environments. Based on your business demands, we can help you plan, deliver and manage a flexible cloud solution tailored to your needs. We offer best-of-breed providers, risk mitigation strategies and dedicated, personalized expertise to deliver economic and operational benefits.

We get Microsoft Azure. And we can share our knowledge with you, so your organization can spend less time managing software and more time putting it to work.
