

# Introducing Azure Everywhere!

An Exciting Opportunity for You to Experience Microsoft Azure at No Cost\*

## What is the Opportunity?

Cloud and mobile are the technology mega-trends in this generation. Agility, scalability, cost-effectiveness, and reliability are benefits that cannot be ignored. However, moving to a cloud platform, such as Microsoft Azure, can be a big transition.

## How Can We Help?

For a limited time, Cloud 9 is offering a **complimentary\* engagement**, to help you evaluate-build your customized cloud strategy in a risk-free way.

You can choose between the following pre-packaged workshops that we have built in conjunction with Microsoft, or we can customize the workshop for you based on your own goals and agenda such as – learning & training, architecture design, pilots & proof-of-value, and migration & deployment.

## Get started with one of the following workshops

- Focus on Business, not infrastructure - migrate, extend your datacenter to the cloud with Azure IaaS.
- Plan your migration off unsupported servers – determine a right course, upgrade your on-prem server to SQL 2016-17 or migrate to Azure.
- Business Intelligence & Analytics – how you can get insights securely to those who need it anywhere, anytime using Power BI.
- Business Continuity – Security; safeguard your organization with hosted, Azure-based disaster recovery and security solutions.
- Building highly available, high performance, and automatically scalable line of business application using Azure PaaS.
- Dynamics ERP in Cloud – migrate your ERP systems to cloud.

## How to Request an Azure Everywhere Workshop

Please email [info@cloud9infosystems.com](mailto:info@cloud9infosystems.com) or call 1-855-225-6839 to arrange the free workshop.

\* Restrictions may apply. Please contact Cloud 9 Infosystems to find out if your organization qualifies for this free engagement.
