ADVISICON

Project, Program, and Portfolio Management
Online Consulting & Training Services
"Helping You Build a Project Management Culture"

Advisicon transforms your organization's project management with a mix of methodology and technology. We are authors, teachers, consultants, and technologists who are passionate about helping your organization learn, scale, and grow.

Our mission is to boost your Project Management efficiencies by improving your processes and technologies, thus creating measurable results.

Our project experts consult and train on how to leverage the entire Office 365 stack, including Project Online to optimize reporting, dashboards and workflow automation. For over 25 years, we have successfully deployed best practices to produce results for customers in all market segments.

Why Customers Rave About our Project Online Training & Consulting!

- Our trainers are authors, speakers and consultants with thousands of students trained
- Customized dashboards and reports give powerful visuals
- Increased productivity with streamlined and improved processes and workflows
- Visualized resource capacity management and cost modeling
- Established best practices by our own award-winning Microsoft recognized MVPs

Turn-Key Process Implementation

- We use the latest tools & templates to expedite implementations
- Leverage Office 365's integrated PM tool suite for a better together experience
- Rapidly realize value from thousands of project deployments

Certified Technology & Methodology Training Experts

- Certified Project Experts (PMI PMPs) & Technology MVPs
- Our trainers have years of Project & Portfolio Management consulting
- Our learning is fun and comes from exhaustive real-world experiences

Powerful Visuals, Dashboards & Reporting

- Project to task level KPI (Key Performance Indicators) alerts
- Integrated Power BI reports and dashboards
- Centralized issues, risks and cost information

"We had consultants from different companies assisting us with Project Server. Advisicon provided faster and better solutions in half the time."

What we do:

Business Value Realized

- Qualitative Proof: Your PMs should not need to spend more than 30 minutes managing their schedules

- Predictive Analytics: Measure planned to actuals (schedule, effort, cost) and forecast based on historical actuals

- Stop firefighting with increased 30-60-90 day or greater visibility of potential issues or risks

Fully Integrated Project and SharePoint PM System

- Templatize your projects eliminating extra keystrokes by your PMs

- Build one version of the truth for all project status reporting

- Create visibility of workload demand vs resource capacity with a global resource pool

Build a Successful PM Culture

- End-users trained in technology aligned to your processes and procedures

- Realize successful end-user adoption through consultative training

- Create visibility and optimization by blending best practices with Microsoft PPM technologies

- Customize Project Online to fit your organization's culture and maturity level integrating Agile or PM methodology best practices
