

Rapid Datacenter Consolidation Jumpstart

Successful migration to Azure requires assessment of the entire IT ecosystem, including servers, applications, licenses, users and more, as well as fully managed application migration and validation.

Combining discovery, migration, and validation into one integrated platform.

What is Rapid Datacenter Consolidation Jumpstart?

RiverMeadow and Movere have integrated and simplified the complex process of IT discovery and application migration to deliver an automated, accurate and fast solution that accelerates migration to Azure. Discover, migrate and validate that your applications are up and running in Azure in 30 days or less.

Why customers use Rapid Datacenter Consolidation Jumpstart

- Automated solution that accelerates migration to Azure.
- Single transaction to discover an entire IT ecosystem and migrate it to the cloud.
- Full discovery, validation, and migration within 30 days or less.

Discovery

- Complete discovery of all IT infrastructure data and insights needed to plan cloud migrations including servers, applications, licenses, users, and more.
- Full visibility into 100% of what's there, how, and when it's being used, by whom, and where.
- Cloud readiness assessment with Actual Resource Consumption and 99.9% accurate cloud sizing recommendations.

Migration

- Rapid, agentless, non-intrusive, hypervisor-agnostic cloud migrations at scale with no interruption to workload and performance.
- Easy migration of any application landscape: physical or virtual, legacy or modern, stateless or stateful, large or small database.
- Live migration ensuring maximum application uptime for continuous 24x7x365 operations.

Validation

- Migration readiness with pre-flight validation checks and full source platform/OS support that includes intelligent application migration and operating system upgrades to mitigate risk.
- Automated target workload test/validation before final cut over to the cloud servers.
- Continuous optimization, monitoring and analysis of IT environments, both on premises and in the cloud.

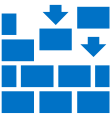

Rapid Datacenter Consolidation Jumpstart: Datacenter Migration and Validation to Azure with Confidence

Automated, accelerated and accurate, RiverMeadow and Movere are the gold standard in IT infrastructure discovery and migration.

- Scan over 1,000 servers per hour, both physical and virtual.
- Right size for the cloud based on performance level data.
- Trusted by thousands of enterprise customers globally.
- Able to go from discovery to migration in fewer than 14 days.

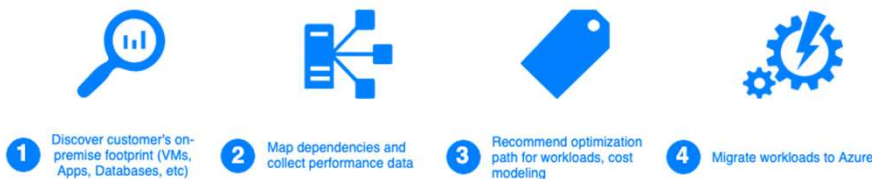

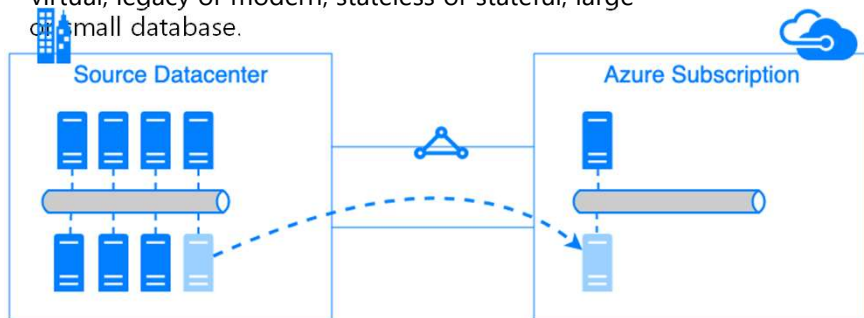

- Migration methodology tested and proven over hundreds of successful migration projects with many leading global brands, resellers and service providers.
- Short, predictable downtimes ensuring maximum application uptime for continuous 24x7x365 operations.
- Easily migrate any application landscape: physical or virtual, legacy or modern, stateless or stateful, large or small database.

Rapid Datacenter Consolidation Jumpstart

Discover, migrate + validate in 30 days or less

- Within 30 days, you will be able to discover, migrate and validate your applications are up and running successfully in Azure.
- From a single dashboard, data is gathered and collected to automatically begin application migration.
- RiverMeadow ISV & SI Services – up to 10 applications running on 100 servers + 30-day Movere license for up to 100 servers for \$59,900.
- Saves customers on average 60-70% on their cloud compute costs.

Rapid Datacenter Consolidation Jumpstart

RiverMeadow and Movere have integrated and simplified the complex process of IT discovery and application migration to deliver an automated, accurate and fast solution that accelerates migration to Azure. Within hours, your datacenter migration will be underway and within 30 days, you will be able to discover, migrate and validate your applications are up and running in Azure.
