

EDI on Azure (LogicApps & Integration Account)

2-Days POC

An evaluation engagement that setup EDI integration scenarios in Azure using Azure Logic Apps and Integration Account

This limited implementation is designed to evaluate if Azure Integration Services (Logic Apps and Integration Account) is right for your organization's EDI in Cloud initiative.

We set up the interfaces with your Trading Partners and Applications, so you can see how the platform will work for you.

This Proof of Concept implementation can be expanded to your production environment.

Deliverables

- Provisioning of Azure Subscription for the POC
- Setup of Integration Account to host schemas, transformation for the POC
- Setup of Integration Account to configure trading partner agreements
- Setup Azure Logic App to receive EDI Document of your choice to your application
- Setup Azure Logic App to receive EDI Document of your choice to your application
- 2 hours of training

Agenda

- Day 1** | Kick-Off meeting with you, review of your current EDI integration processes, finalize the scope of POC, provisioning of Azure Subscription and setup of integration account with schemas, transformations and agreements
- Day 2** | Setup Azure Logic App to receive-send EDI data to & from a trading partner. Final walkthrough with you, Proof of Concept closure, and planning of next steps.
