

Breathe new life into Windows and SQL Server 2008 solutions with Azure DXC Concerto™

Secure and protect end of life server products while transforming them in the Azure cloud.

Benefits

- Reduces risk of disruption
- Improve performance and innovation capabilities
- Increase security and ensures regulatory compliance
- Gain value with license conversion and Azure programs
- Streamlined migration and management options supported by an expert team of Microsoft Azure and security professionals

Secure now, upgrade and transform when ready

The end of support for Windows and SQL Server 2008 and Exchange 2010 is coming soon, including the discontinuation of security updates which could put your applications and business at risk. For organizations relying on these products, planning must begin now to avoid disruption and security issues.

Start planning now!

July 9, 2019	End of support for SQL Server 2008 and 2008 R2
January 14, 2020	End of support for Windows Server 2008 and 2008 R2
January 14, 2020	End of support for Exchange Server 2010

Finding value and time in Azure

While there are multiple options to protect organizations while working to

modernize the applications that rely on these products, moving your current workloads into Microsoft Azure provides maximum value. Your organization can save costs and gain time, including:

- Three years extended security updates at no additional charge
- More time to modernize on your terms
- The benefit of the latest security, performance and innovation features in Microsoft Azure, plus more than 70 compliance certifications
- Reduced rates when converting existing licenses
- Azure consumption credit for new qualifying workloads during proof of concept timeframes – up to \$15k over the first three months.

Azure Expert MSP

Single-hop to new Exchange functionality with Office 365

Migrating email to Office 365 is your best and simplest option to help you retire your Exchange 2010 deployment. With a migration to Office 365, you can make a single hop from old technology to the latest features, compliance capabilities, Power BI, Focused Inbox, Delve Analytics and more. In addition to having the latest in messaging technology, your organization benefits from:

- Office 365, and your users, are the first to receive new features and experiences.
- No more upgrades - you are always on the latest version of Exchange in Office 365.
- Choose from rapid cutover migration options or a hybrid migration by moving mailboxes to Office 365, while upgrading servers to Exchange 2016. These servers may qualify for Azure consumption credit and other licensing offers.

Breathe new life into your applications starting with the Azure Express Migration.

Rapidly evolve your applications running on end of life server with expert migration services from DXC Concerto. The Azure Express Migration facilitates modernization of workloads/applications

with an analytically -driven and proven process to move application workloads into Microsoft Azure.

Key aspects of the migration include:

- Upgrade of selected legacy EOL servers
- Migration services performed in 1-4 weeks using our data-driven workload assessment and migration process
- Immediate benefits from increased application resiliency and performance from the Azure platform, followed with on demand support for Azure through DXC Concerto
- Potential savings through license conversion and consumption credit programs, as well as three years of critical updates for Windows Server and/or SQL Server

Whether you have critical workloads that demand a full suite of services or you're looking for a lighter-touch service to supplement internal bandwidth or control costs, the Azure Express Migration can be complemented with Azure platform management, cloud advisory and planning, DevOps, disaster recovery, and security and compliance services.

Our approach to your solutions are as personalized to your needs as the cloud itself. We recognize that cloud compute, storage, virtual networking and security are a set of integrated processes.

The power of the Azure cloud is within reach with the bench strength of DXC Concerto and the value brought through our partner relationships.

We have been recognized as:

- Microsoft Azure Expert Managed Services Provider (MSP)
- AWS Premier Consulting Partner
- Tier 1 Microsoft Cloud Services Provider
- First to market with a hybrid cloud solution fully integrated with Microsoft Azure, powered by Cisco's Application Centric Infrastructure for Microsoft Cloud Platform.

Why DXC Concerto?

DXC Concerto, the mid-market cloud offering within DXC Technology, specializes in providing a best-in-class multi-cloud platform that helps organizations accelerate digital transformation and realize their full potential. We make cloud adoption easy with unrivaled uptime and accelerated delivery, worldwide. Our strategic partnerships include Microsoft, NetApp, Cisco and Amazon Web Services (AWS). Delivering application expertise, innovation and service excellence in every engagement, we serve as trusted advisors to clients and application partners seeking to better manage risk and reduce operational challenges.
