

Cloud Starter Kit (CSK)

Networking at Cloud Speed

If you're looking for an easy button to the Cloud, we've got a solution for you!

Stratum developed the Cloud Starter Kit (CSK) as an easy way for our customers to get the cloud pain free & fast. Stratum's cloud experts will assess your entire infrastructure and develop the most clear cut and easy path to the cloud.

Included in the CSK:

- Network Design
- Basic Governance
- Prototype Network Deployment

The CSK is designed to help an organization understand what their infrastructure will look like post migration.

Once we have designed the network, Stratum will provide:

- Standardized suggested naming conventions
- Standardized matrix for planning access controls along with instructions for implementing them
- Standardized list of suggested cost management tools/techniques

Our cloud starter hit is the fastest way to the cloud.
No more waiting 6-18 months for a migration.

Stratum's CSK will get you there in days, not months!
