Custom Azure App Development

Modernize your workforce with a proven two-day workshop set to transition your applications to Microsoft Azure

Many organizations today rely on custom applications to enhance productivity, engage customers and support business processes. These applications are sometimes created using outdated technologies that are complex and expensive to support. By modernizing these applications it enables businesses to enhance usability while benefiting from modern technologies.

Azure provides many features and capabilities that traditionally required large amounts of effort to design and implement. As an alternative to simply moving the servers used to host these applications, in most cases exhibiting poorer performance for more cost, Azure leverages new technology and capabilities to get you closer to your digital goals.

AZURE **APP MODERNIZATION WORKSHOP**

Softlanding's Azure App Modernization Workshop is a two-day engagement that will cover the benefits of Azure and highlight the Azure services that will light up your applications. We will then guide you through the process of reviewing your existing application and mapping it to Azure PaaS services. At the end of the workshop you will have a high level architectural design and roadmap for implementing your application on Azure.

The workshop includes:

- Overview of Azure PaaS Services
- Review of an existing application
- Mapping of application features and functionality to Azure workloads
- Creation of a roadmap for the modernization of the application

Benefits of **Application Modernization**

Digital Transformation
Enhance applications to take advantage of modern technologies to change the way you do business and gain competitive advantages.

Cost Reduction
Reduce your operation and maintenance costs by eliminating unsupported technologies and infrastructure.

Business Agility
React quickly to changing business and user needs by utilizing modern development and deployment technologies.

Greater Integration
Enhance functionality by integration with other enterprise systems and solutions including SaaS (Software as a Service) offerings.

Reduced Financial Risk
With no upfront investment in hardware and no annual commitment, Azure proposes a lower financial risk that everyone can stomach.

ABOUT SOFTLANDING

Founded in 2000, Softlanding helps organizations be their best by providing technology solutions and services that make them more productive. Areas of specialty include end-to-end Azure services, Microsoft Enterprise Infrastructure and Managed IT Services. As a recognized leader in empowering enterprises with solutions and services built on the Microsoft Cloud and on-premises platforms, Softlanding is proud to be named winner of the Microsoft 2017 IMPACT Award for Enterprise Cloud Platform Innovation and finalist for Enterprise Cloud Productivity Innovation.
