

# Windows Virtual Desktop

Solution Brief

[www.brio.co.in](http://www.brio.co.in)

The best virtual Windows and Office experience, delivered on Azure

**Access Windows 10 desktop and applications from anywhere, on any device.**

Regardless of your device type (Windows, Mac, iOS, Android or any other device with an HTML5 web client) bring-your-own-device (BYOD) and remote connect to your enterprise experience with Windows Virtual Desktop.

**Delivers the only multi-session Windows 10 experience**

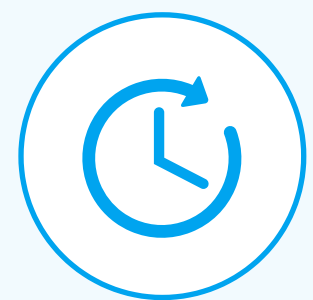

Access the fully managed, always up to date, rich Windows 10 experience from any end-user device platform. Reduce infrastructure costs - by right sizing VMs and shutting down VMs in use. Increase utilization of VMs with Windows 10 multi-session.

No additional license costs - Windows Virtual Desktop is a free service and can be used with your existing Microsoft 365 or Windows per user license.

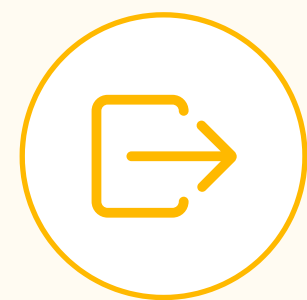

**Leverage the seamless Microsoft Teams and Microsoft Office experience**

Provide employees the same experience as a local desktop or laptop - whether you are managing your inbox with outlook, sharing files on OneDrive or collaborating with colleagues on Microsoft Teams meetings. New Container technology enables fast load times and provides a performant experience for Outlook, OneDrive, Cortana, Search, Teams. Virtualize entire desktop or select applications

**Deploy and scale in minutes**

Simplify deployment and management of your infrastructure and quickly scale based on your business needs. Manage users and security via Azure Portal. Dynamically scale virtual machines using depth-first or breadth-first load balancing. Benefit from the integrated security and management of Microsoft 365.

**Migrate your existing Windows Server (RDS) desktops and apps to Azure**

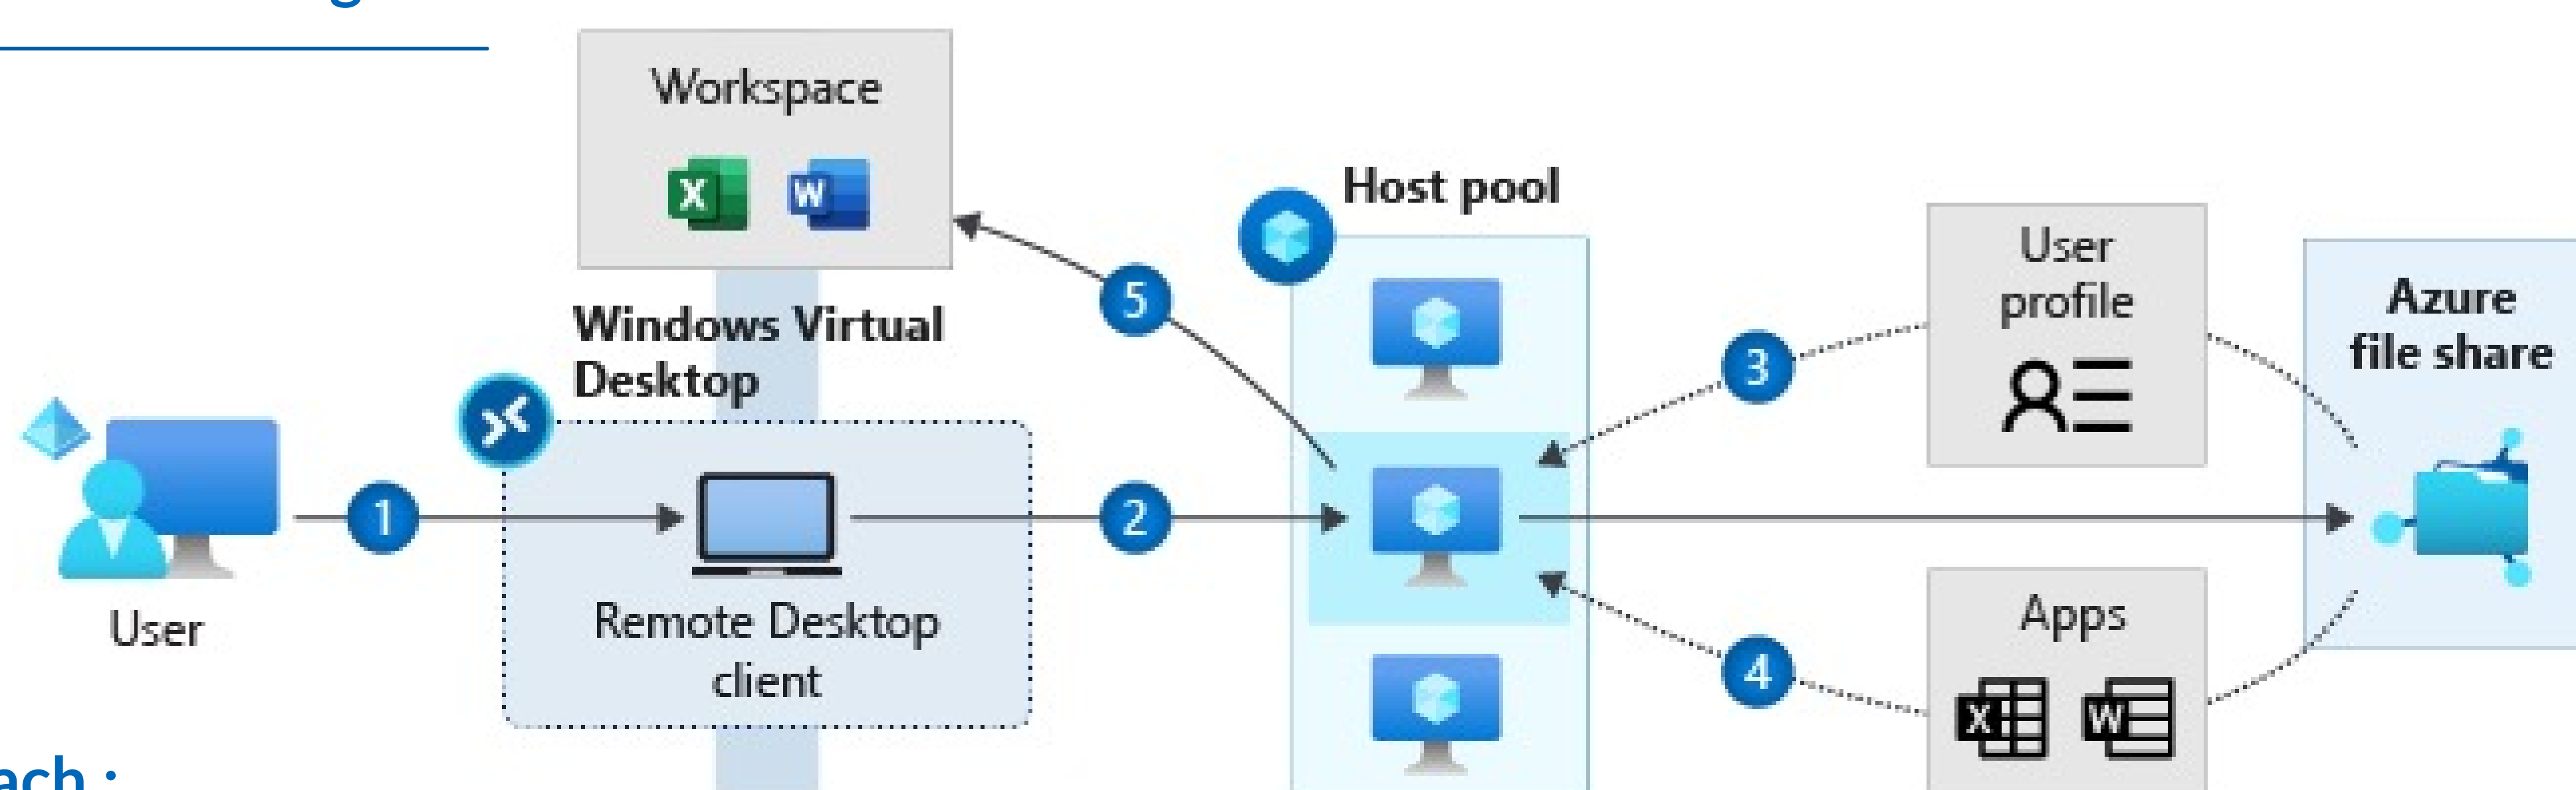

Bring existing Remote Desktop Services (RDS) and Windows Server desktops and apps to any computer. Reduce costs through unified management and deployment experience for Windows Server, Windows 10, and Windows 7 desktops and apps. Benefit from free Extended Security Updates for Windows Server 2008 and 2008 R2 desktops and apps.

**WVD on Azure is the good to solution, if you want:**

- Migrate your existing desktops or VDI to cloud
  - Set up your remote and modern digital workplace
  - Users need to be able to work from any device from anywhere
  - Provide a secure, consistent, and performant experience to the apps employees need to do their work.
  - The ability to add users quickly and easily.
  - To scale efficiently on demand.
- A seamless rich client experience with Office Suite, OneDrive, Sharepoint, and Teams.
- To bring Remote Desktop Services (RDS) to your users.
  - Integrated security and management e.g. Microsoft 365, AAD.
- To run Windows 7 legacy applications post the upcoming Win 7 EOL.

## WVD Architecture Diagram :

## Our Approach :

Assess existing environment to understand current user landscape

Design secure and resilient WVD on Azure or Citrix environment

Build and deploy user-persona based WVD host pools and Win 10 images

Phased migration to the new WVD environment
