

Azure Red Hat OpenShift: 5-Day PoC

\$5,000 / 5-Days

Get up and running with a Red Hat OpenShift cluster and integrate it directly with Azure Services.

As a Microsoft Gold Partner and a Red Hat Apex Partner, Shadow-Soft's certified engineers can architect, implement, and integrate an Azure Red Hat OpenShift (ARO) solution to meet unique requirements. Rapidly provision and configure an ARO cluster and integrate it directly with Azure Services, allowing your organization to automate container management and enable developer speed.

What's Included:

- Rapidly provision and configure a Azure Red Hat OpenShift cluster with cluster sizing, capacity/network planning, storage, cluster monitoring, and integrated services
- Configure platform operations, including cluster security and governance, backup, performance, logging, metrics, and capacity
- Assess and recommend Azure architecture to support Red Hat OpenShift
- Integration with Azure Services, specifically Identity Management and Secrets Management for containerized applications

Key Benefits:

- Azure and Red Hat Certified Engineers
- PoC funding programs available
- Enablement and knowledge transfer via "over the shoulder" training
