

Data Platform Healthcheck

Solve performance problems, provide operational stability and improve security with Coeo's thorough review

Giving your SQL Server data platform a thorough Healthcheck ensures your databases and their surrounding environment are running optimally, getting the most from your investment and securing the best possible performance for your applications and their users.

Coeo-led troubleshooting

The Healthcheck covers all SQL Server data platform services with in-depth focus on the performance, stability and security of the database engine. Your consultant will use a library of bespoke troubleshooting scripts and analysis tools to discover issues, whether your SQL Server platform is deployed on-premises, you use outsourced hosting services or public cloud platforms.

Coeo's Approach

A typical Healthcheck consists of two days of technical discovery by one of our specialists, using read-only configuration review scripts, performance capturing tools and hands-on platform checks. We can deliver this on-site or remotely, working alongside your in-house team or with limited operational support. Our goal is to provide a fresh pair of eyes and additional skills.

The benefits

The Healthcheck will:

- Create problem statements which describe any existing concerns

- Catalogue the server's services, components and dependencies
- Review the configuration and operation of the database server
- Review the performance of the server
- Identify the causes of the defined problems and any unnecessary risks

Once the discovery phase is complete, Coeo will document its findings and recommendations in a detailed technical report. This will provide you with a comprehensive list of issues prioritised by the level of operational risk they present, along with an explanation of our observations and the reason for concern. Your Healthcheck report will also contain tailored remediation guidance, giving you the information you need to solve performance problems, improve security and reduce the likelihood of downtime.

Why Coeo?

Coeo are trusted analytics and data management experts, delivering technology strategy and support for businesses who need to get the most from their data.

We architect, optimise and migrate mission-critical transaction processing systems and deploy business intelligence solutions that win business confidence and deliver insight.

Next steps

Our Healthchecks start from £7,500. To book your Data Platform Healthcheck, please contact us at: info@coeo.com
