CORE CONSULTING CAPABILITIES

CUSTOM SOFTWARE DEVELOPMENT

Expert development services for creating and enhancing custom applications with Java, .NET, and JavaScript technologies. Services performed in Keyhole project teams or by staff augmentation.

ENTERPRISE MODERNIZATION - SPA, MICROSERVICES & BLOCKCHAIN

Helping the enterprise navigate the paradigm shift to single-page applications, Microservices application architectures, and blockchain technology.

From current architecture analysis to technology selection and adoption, or even adapting current data and business logic to more modern architectural approaches.

KNOWLEDGE TRANSFER & EDUCATION

Real-world, hands-on experience is translated into custom coursework designed to help your team avoid adoption pitfalls.

Popular courses include React, Blockchain, Microservices, Angular, Spring Boot, and more.

MORE INFORMATION

We primarily work with Java, .NET and JavaScript technologies and are a certified Microsoft Competency Partner. Visit KeyholeSoftware.com for more information on how expert Keyhole consulting services can aid in your enterprise development initiatives.

WHAT SETS US APART? THE EXPERT KEYHOLE TEAM.
