

Azure GlidePath™ for Governance: Where business process unifies with cloud operations

MessageOps developed our Azure GlidePath™ services for Governance to help businesses take the complicated out of creating a Governance program. Our services are designed for companies that recognize the need for Governance, but have not yet developed a fully mature Azure Governance program.

Companies looking to keep risk at acceptable levels, protect customer data, maintain availability of systems and services, and have a consistent policy and audit compliance are the key drivers for IT Governance.

Our Methodology:

Our Azure GlidePath™ services for Governance are based 100% on Microsoft's Azure Cloud Adoption Best Practice Framework that sets the foundation for the *Five Disciplines of Cloud Governance*, which is the most valuable, and often overlooked aspect of a successful Azure Cloud program:

1. Cost Management
2. Security Baseline Resource
3. Consistency
4. Identify Baseline
5. Deployment Acceleration

Governance Services:

Our services will help you achieve your strategic security and availability objectives, all while meeting compliance requirements and controlling and optimizing your cloud spend. We will work with your team to:

- ✓ Establish Azure Management Groups
- ✓ Create Role-based Access Controls
- ✓ Create Azure Policies
- ✓ Create Azure Blueprints
- ✓ Create Azure Workflows
